

Is 00223.cc a scam? TrustSniffer's high-risk assessment: 0/100

00223.cc

Verdict

0

OUT OF 100

CRITICAL RISK

00223.cc shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 70%.

What this site appears to be

Page contains only a single empty div with id 'page-view' and no user-visible content, links, or forms.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	17 flagged it VirusTotal	RISK

The page as captured

<https://00223.cc/>

What 00223.cc served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website 00223.cc currently presents an effectively empty page consisting only of a minimal page container, with no visible business model, products, legal information, navigation, forms, or stated operator; its apparent purpose therefore cannot be established from the visitor-facing content.

Scam/Impersonation Risk

The site presents a **confirmed blacklist and malicious-detection risk**. External security assessment recorded 17 malicious detections and one suspicious detection, with threat detections from multiple established security providers; this is materially more significant than the absence of visible phishing forms or brand-impersonation content. No conflicting legal identities or direct brand impersonation were observed, but the homepage's empty state and its associated network behavior provide no credible basis for establishing a legitimate purpose. The captured behavior generated extensive non-whitelisted external activity, including external requests and posts, despite rendering no user-visible content. Abuse reports associated with a separate hosting-provider IP were explicitly attributed to shared infrastructure and discounted as site-specific evidence.

EVIDENCE

- Homepage: only a single empty `div` with no visible text, links, forms, or business-model information.
- External reputation: 17 malicious detections, 1 suspicious detection, and a confirmed blacklist status.
- Browser behavior: 48 external XHR requests and 4 external posts were observed; all were classified as non-whitelisted, across 2 successful runs.
- Registration record: registered 2026 (~0.43 years old).

Regulatory Verification Notes

The site does not provide visible legal, licensing, registration, or operator disclosures from which regulatory status can be established. This is a substantive transparency gap because the page supplies no identifiable business activity against which a licensing obligation could be assessed. The domain's historical records contain 9 archive snapshots spanning 2021–2023, but that limited historical material does not independently establish the current operator. The available evidence is therefore insufficient to connect the website to a verified real-world entity. A valid domain-validated certificate confirms encrypted transport only and does not establish legal identity, authorization, or regulatory standing.

EVIDENCE

- Homepage: no visible company name, legal entity, license number, registration number, terms, or regulatory disclosure.
- Historical web record: 9 snapshots spanning 2021–2023, covering 3 tracked years.
- Technical hosting record: served from AS36352 (AS-COLOCROSSING - HostPapa, US).
- TLS certificate: issued by ZeroSSL RSA DV SSL CA 2 (DV), valid to 2026-10-13.

What to Verify Next

Before any sensitive interaction, an independent party should establish the operator's legal identity and confirm any claimed authorization directly with the relevant financial, payments, or digital-asset regulator. Contact details should be confirmed through an independently sourced channel rather than relying solely on information presented by the site. The domain and hosting indicators should also be checked against current security intelligence immediately before any operational decision, because the site's content does not provide a reliable basis for assessing its intended function.

EVIDENCE

- Regulatory registry check: independently confirm the operator and any required authorization before engagement.
- Independent contact-channel check: validate ownership and support routes using an offline or separately sourced reference.
- Security reassessment: obtain a current reputation and malware assessment before permitting access from an enterprise or financial environment.

Summary Verdict

The website has a **critical trust posture** and its identity remains unverified. The convergence of confirmed external threat detections, blacklist status, absent visitor-facing content, and insufficient identity evidence makes sensitive interaction inappropriate.

Infrastructure Integrity

Infrastructure records identify no CDN or WAF, no edge IPs, and nine likely origin IPs. The resolved infrastructure is associated with AS214677 and DeluxHost, while the direct hosting telemetry identifies AS36352 and AS-COLOCROSSING - HostPapa; this provider and resolution variation offers no compensating assurance against the external reputation findings.

EVIDENCE

- Infrastructure resolution: 9 unique IPs, 0 edge IPs, and 9 likely origin IPs; no CDN detected.
- Resolved hosting: AS214677 (DeluxHost - Matteo Martelloni trading as DELUXHOST, IT).
- Direct technical hosting record: AS36352 (AS-COLOCROSSING - HostPapa, US).

Closing Assessment

Enterprise controls should block or isolate the site and prevent credential, account, or financial interaction unless an independent investigation produces compelling contrary evidence and formally approves the exception.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 151.243.213.242 (Matteo Martelloni trading as DELUXHOST, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 00223.cc.

- The request stayed on 00223.cc. It was not redirected to another domain. [CLEAR](#)
- Registration is published under DYNADOT LLC. [CLEAR](#)
- DNS for this domain is served by dyna-ns.net, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-03-13. [NOTED](#)
- The earliest public archive of this site is from 2021-11-22. [CLEAR](#)
- It is hosted on AS-COLOCROSSING, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 00223.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
