Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

00829.cc is a web domain whose supplied page-level evidence does not establish a reliably attributable product, service, operator, or business model; its apparent purpose therefore cannot be established for a prospective visitor.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence recorded malicious detections and confirmed blacklist listings. Fifteen malicious detections were recorded, with threat indications from Fortinet, Kaspersky, and Sophos; this is materially stronger than an isolated reputational concern. No separate identity inconsistency or confirmed impersonation signal was identified, but the external threat evidence is sufficient to make login, credential submission, and financial activity inappropriate. The domain's limited historical presence also provides little provenance context, although the available archive evidence does not indicate suspicious repurposing.

EVIDENCE

- External security telemetry recorded 15 malicious detections and a confirmed blacklist status, with Fortinet, Kaspersky, and Sophos among the flagged vendors.
- The domain registration record shows registration on 2026-01-18 and an age of approximately 0.58 years.
- Web-archive telemetry records 1 snapshot, first seen on 2024-08-07 and last seen on 2024-08-07, with 1 year tracked.

Regulatory Verification Notes

The real-world operator identity remains unverified, and no independent regulatory registration or licensing confirmation is available in the supplied record. The on-site disclosure position is unclear; this is a verification gap concerning legal and regulatory status, not by itself proof of wrongdoing. Registration through DYNADOT LLC and use of privacy-protected registration are administrative facts rather than evidence of an identity contradiction. The available page-authority signal is low, providing no meaningful basis for institutional attribution.

EVIDENCE

- The domain is registered through DYNADOT LLC; the recorded registrant organization is “Super Privacy Service LTD c/o Dynadot,” with the owner marked private.
- Hosting is attributed to DeluxHost - Matteo Martelloni trading as DELUXHOST, IT, on AS214677.
- The site's transport certificate is a DV certificate issued by ZeroSSL RSA DV SSL CA 2, valid to 2026-10-21.

What to Verify Next

Any proposed engagement should first establish the operator's legal identity and confirm any claimed authorization directly with the relevant financial or commercial regulator. Contact and support channels should be validated through an independently sourced route, and payment arrangements should be assessed for dispute and recovery protection. Until those checks produce authoritative confirmation, sensitive interaction should remain suspended.

EVIDENCE

- Independent identity verification status is unknown.
- The assessment identifies login, credential, and financial use as unsafe interaction categories.
- No independently confirmed regulatory source is identified for the site.

Summary Verdict

The overall posture is critical and clearly unsuitable for sensitive interaction. Confirmed external threat contradictions outweigh the limited positive technical indicators, while the site's legitimacy and real-world operator identity remain unproven.

Infrastructure Integrity

The site is resolved through direct hosting rather than a mainstream CDN or WAF, with multiple addresses assessed as likely origin infrastructure. The hosting arrangement therefore offers limited protective separation between the service and its underlying infrastructure; DNS telemetry also recorded fast-flux-like and geographic-registry-mismatch characteristics as infrastructure signals, not as independent proof of malicious activity.

EVIDENCE

- Hosting provider: DeluxHost - Matteo Martelloni trading as DELUXHOST, IT; ASN: AS214677; registry: RIPE NCC; infrastructure country: AE.
- CDN detected: none; edge IP count: 0; likely origin IP count: 4.
- The resolved server address recorded by technical sensors was 151.243.213.242.

Closing Assessment

Sensitive use should not proceed unless independent identity, authorization, and payment-protection checks produce satisfactory confirmation through trusted channels.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Identity score50/100

Identity verification confidence15%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 00829.cc.

- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by dyna-ns.net, across 2 name servers. NOTED
- The registration is paid up to 2027-01-18. NOTED
- The earliest public archive of this site is from 2024-08-07. CLEAR
- It is hosted on DeluxHost, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 00829.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
