Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal parked-domain landing page for 061kp.cc, presenting the domain as expired and potentially available for sale through Dynadot auctions. It offers no active service, account functionality, financial product, or other substantive business model beyond domain-sale referrals and advertising.

Scam/Impersonation Risk

The site is subject to a confirmed blacklist designation based on multiple external threat-intelligence detections, including 16 malicious assessments and findings from several major security vendors. This is the decisive contradiction and warrants a security-forward posture even though the current page itself is only a parked-domain notice with no login form, payment form, active service, or detected brand-impersonation content. A separate browser-safety assessment did not classify the domain as malicious, and no phishing or impersonation indicators were found on the captured page; those limited benign signals do not offset the confirmed blacklist evidence. No identity contradiction was observed because the available pages do not present two conflicting legal-entity names.

EVIDENCE

- The homepage states that the domain has expired and may be available through Dynadot auctions.
- External reputation assessment recorded 16 malicious detections, with Fortinet, Kaspersky, and Sophos among the flagged vendors.
- The homepage contains no forms or login mechanism; behavioral inspection recorded 0 external XHR requests, 0 wallet-connect runs, and 0 hidden forms.
- Domain history contains 21 archive snapshots spanning 2024–2025, with 2 years tracked.

Regulatory Verification Notes

The current landing page is not an operating financial or commercial service and provides only limited legal context through Terms of Service and Privacy Policy links. It does not identify a clearly operating corporate entity or disclose a license or registration number; therefore, the site's real-world operator remains unverified. The Dynadot reference supports the stated domain-sale presentation, but it is not evidence that the domain is licensed, endorsed, or suitable for regulated activity. The absence of a broker-dataset match provides no positive regulatory conclusion.

EVIDENCE

- The homepage identifies the property as a domain that may be for sale through Dynadot auctions.
- The captured page provides Terms of Service and Privacy Policy links but no stated license authority or license number.
- The domain was registered in 2025 through Dynadot Inc; archive records show 21 snapshots spanning 2024–2025.
- The site's authority signal is low, with an OpenPageRank score of 0.

What to Verify Next

Any party encountering this domain through an external advertisement, message, or redirect should independently confirm the intended destination before following links or submitting information. The stated Dynadot auction status should be checked through Dynadot's independently accessed official channels rather than relying on the parked page. If the domain later presents a financial, brokerage, or other regulated service, the claimed operator and license should be checked directly against the relevant jurisdictional registry; credentials, payments, and financial information should not be submitted while the blacklist status remains unresolved.

EVIDENCE

- The homepage describes a sale listing rather than an active service.
- The page contains no user accounts, sensitive forms, or payment workflow.
- The current operator identity is unverified in the available identity evidence.
- External threat detections remain the principal unresolved security issue.

Summary Verdict

The overall posture is **critical trust risk** with a failed provenance assessment and material sensitive-interaction risk. The available evidence does not support treating the domain as an established or independently verified operating entity.

Infrastructure Integrity

The site resolves directly to AS133618, TRELLIAN-AS-AP operated by Trellian Pty. Limited in Australia, with no CDN or WAF detected and one likely origin address. Its transport encryption uses a DV certificate issued by YR1, valid through 2026-10-18; this provides encryption in transit only and does not establish legitimacy.

Closing Assessment

The appropriate disposition is read-only observation only, with no credential, account, payment, or other sensitive interaction unless the domain’s reputation and intended ownership are independently cleared.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 061kp.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
