

Is 0668kf.com a scam? TrustSniffer's high-risk assessment: 0/100

0668kf.com

Verdict

0

OUT OF 100

CRITICAL RISK

0668kf.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Local county-level party/government site with lists of news items, notices, downloadable forms and resources related to party organization, cadre work, poverty alleviation and talent policies.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://0668kf.com/

What 0668kf.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

0668kf.com presents itself as a local government and party-affairs information portal, displaying Chinese-language news, notices, policy materials, administrative forms, cadre-management resources, and poverty-alleviation content. Its apparent business model is informational public administration rather than payment collection or investment solicitation, although the homepage title “365sport” is inconsistent with that stated subject matter and requires explanation.

Scam/Impersonation Risk

The site’s content is internally structured like a local government portal and contains no observed login form, payment request, investment offer, or direct impersonation of a named brand. However, this benign page presentation is decisively outweighed by confirmed external threat signals: the domain is blacklisted, multiple security vendors classify it as malicious or suspicious, and a kill-switch condition was triggered by the volume of malicious detections. The combination of a government-themed presentation, the unrelated “365sport” homepage title, and strong external detections creates a material risk that the captured content does not

adequately represent the site's operational purpose. No separate legal-entity identity contradiction or confirmed phishing indicator was observed in the supplied page findings.

EVIDENCE

- The homepage displays the title "365sport" while its visible content concerns the Communist Party, local administration, policy notices, and county-level organizational work.
- External evaluation recorded 14 malicious detections and 2 suspicious detections across 21 effective evaluations; Kaspersky and Sophos were among the flagged vendors.
- The domain was recorded as blacklisted by two external sources, while Google Safe Browsing was recorded as non-malicious.

Regulatory Verification Notes

The available page content is consistent with an informational government or party-affairs portal, but the real-world operator remains independently unverified. No license claim or registration number appears in the supplied content; for an informational public-service site this is a disclosure gap requiring confirmation of the responsible public authority, not standalone evidence of fraud. Historical data shows an established domain and multi-year archival presence, but that provenance does not resolve the conflict between the site's apparent public-sector subject matter and its unrelated homepage title or external threat reputation.

EVIDENCE

- Domain registration records show creation on 2018-07-09 and an age of approximately 8.11 years, with NameSilo, LLC listed as registrar.
- Web-archive records contain 16 snapshots spanning 2010–2026, covering 17 tracked years.
- The homepage contains government and party-administration materials but does not present a license claim or registration number in the supplied capture.

What to Verify Next

Before any sensitive interaction, an organization should confirm through an independently sourced official government directory or an offline public-authority contact that this domain is an authorized publication channel. The domain's current content, homepage title, and ownership connection should be reconciled against that independent source. Pending such confirmation, use should remain limited to passive viewing; credentials, account access, downloads requiring execution, and financial activity should not be undertaken through the site.

EVIDENCE

- The captured homepage offers informational articles, notices, policy documents, and downloadable administrative forms rather than a clearly identified official-domain framework.
- The page analysis recorded no login form, no sensitive form, and no untrusted form destination.
- The site's independently assessed operator identity is unverified.

Summary Verdict

The website has a **critical trust posture** because strong external threat detections and confirmed blacklist status override the otherwise benign appearance of its public-sector informational content. The site may

resemble a legitimate local government portal, but the available evidence is insufficient to establish that the domain is an authorized or trustworthy channel for sensitive interaction.

Infrastructure Integrity

The site resolves directly to hosting provided by PEG-LA – PEG TECH INC in the United States, with no detected CDN or WAF layer and one likely origin address. Transport encryption is present, but the certificate uses domain validation only; these controls provide encryption and hosting continuity, not proof of legitimacy.

EVIDENCE

- Served from AS398823, PEG-LA – PEG TECH INC, US.
- TLS certificate issued by YR1 with DV validation, valid to 2026-11-02 02:10:15 UTC.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN was detected.

Closing Assessment

Prospective users and institutions should treat the domain as unsuitable for credentials, account access, or financial transactions unless its authorization is independently confirmed through an official offline channel. Until that confirmation occurs, passive observation is the proportionate operating posture.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 0668kf.com.

- The request stayed on 0668kf.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2027-07-09. NOTED
- The earliest public archive of this site is from 2010-04-25. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 0668kf.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
