

Is 06tx1.com a scam? TrustSniffer's high-risk assessment: 0/100

06tx1.com

Verdict

0

OUT OF 100

CRITICAL RISK

06tx1.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 75%.

What this site appears to be

Chinese-language local government administrative office site (鄂州市机构编制委员会办公室) providing notices, policy documents, downloads and contact details. Appears informational and non-commercial.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://06tx1.com/

What 06tx1.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as a Chinese-language local government and public-service portal for 鄂州市机构编制委员会办公室, offering administrative notices, policy documents, institutional information, downloadable forms, and online service resources. Its apparent purpose is informational rather than commercial, but the domain context and external security findings materially undermine confidence that the current site is an authentic government-operated service.

Scam/Impersonation Risk

The site carries a confirmed blacklist finding, with malicious detections from external security intelligence sources. This is a direct contradiction to the benign government-information presentation and warrants treating the domain as unsuitable for sensitive interaction. The homepage also contains the unrelated title text “38365365.com打不开,” an unexplained contact-point anomaly that further weakens confidence in the page’s identity and integrity. No conflicting legal-entity names or explicit brand-impersonation indicators were observed, but the available evidence does not independently verify the operator.

EVIDENCE

- The homepage and administrative sections present government notices, policy documents, institutional reform information, public-service resources, and downloadable forms, with no evident commercial monetization.
- The homepage DOM repeatedly displays “38365365.com打不开,” despite the assessed site being 06tx1.com.
- External reputation results record 12 malicious detections and 2 suspicious detections, including flags from Kaspersky and Sophos; the domain is blacklisted by two external sources.
- Domain registration evidence records creation on 2018-07-09, with an age of 8.11 years.

Regulatory Verification Notes

The pages describe a public administrative office and do not present a commercial license, financial-service authorization, or other regulated-business credential. That absence is a verification gap rather than proof of fraud, but the site's real-world operator remains unverified and the apparent government affiliation should not be accepted solely from on-page presentation. The domain is registered through NameSilo, LLC. Transport security is present, but a domain-validated certificate establishes encrypted transport only; it does not authenticate the purported government operator.

EVIDENCE

- The homepage and “编办概况” content identify the apparent subject as the 鄂州市机构编制委员会办公室 and provide administrative-office navigation.
- The site's hosting resolves through AS398823, operated by PEG-LA - PEG TECH INC, US.
- The site's TLS certificate is DV, issued by YR1, and valid until 2026-11-02T07:15:48+00:00.
- The domain's registrar is NameSilo, LLC, with an expiration date of 2027-07-09T05:11:32Z.

What to Verify Next

Before any login, credential submission, download of sensitive software, or financial interaction, an institution should confirm the official domain through an independently sourced government directory or an offline government contact channel. Page content and contact details should be compared with a separately verified official publication, and downloaded files should be inspected in a controlled environment rather than opened on a production endpoint. If the site is intended only for public reading, access should remain limited to non-sensitive browsing until the domain association is independently confirmed.

EVIDENCE

- The homepage contains no login form, sensitive form, hidden form, or external password-submission destination.
- The behavioral examination recorded no external XMLHttpRequests, external POST activity, wallet connection, clipboard hijacking, or suspicious inline scripts.
- The site provides notices, policy documents, and downloadable administrative forms through its public information pages.

Summary Verdict

The overall posture is **critical risk**. The site's apparent public-service content is insufficient to establish authenticity, and the confirmed external threat and blacklist findings dominate the assessment. Identity verification remains unresolved.

Infrastructure Integrity

The site is not positioned behind a detected CDN or WAF and resolves to a single likely origin IP. This provides limited protective separation between the public endpoint and hosting infrastructure; the presence of valid TLS should be treated only as an encryption control, not as evidence of legitimacy.

Closing Assessment

Sensitive interaction should be suspended unless the domain is first validated through an independently confirmed official channel; any unavoidable review should remain limited to controlled, read-only access.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 06tx1.com.

- The request stayed on 06tx1.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2027-07-09. NOTED
- The earliest public archive of this site is from 2012-02-17. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 06tx1.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
