

Is 07ying5.com a scam? TrustSniffer's high-risk assessment: 0/100

07ying5.com

Verdict

0

OUT OF 100

CRITICAL RISK

07ying5.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Chinese government agency news page listing press releases and policy updates (National Development and Reform Commission). Mostly date-stamped headlines and links to articles.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

https://07ying5.com/

What 07ying5.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents a Chinese-language government-news interface containing dated policy releases, economic updates, institutional information, and contact navigation, with an apparent purpose of publishing public-sector announcements rather than offering commercial services.

Scam/Impersonation Risk

The site presents government-publication content, but that apparent identity is materially contradicted by external threat intelligence. The domain is **blacklisted**, with multiple malicious detections and a confirmed high-severity reputation signal; this outweighs the homepage’s benign informational appearance. The page title, “365APP下载,” is also inconsistent with the government-news presentation and increases concern that the content may be placed on an unrelated or compromised domain. No separate identity contradiction between two legal-entity names was observed, and no page-level login, phishing form, or active credential-capture behavior was detected; these limited benign observations do not resolve the confirmed reputation conflict.

EVIDENCE

- Domain registration telemetry: registered 2018-06-27T11:18:26Z, approximately 8.15 years old, through NameSilo, LLC.
- Web-archive telemetry: 9 snapshots from 2021-11-23T04:16:47Z through 2026-03-01T00:34:45Z, covering 6 years.
- The homepage title is “365APP下载,” while the visible body presents Chinese National Development and Reform Commission news and policy material.
- External reputation telemetry records 15 malicious detections and 1 suspicious detection; two named security vendors flagged the domain.

Regulatory Verification Notes

The homepage attributes its material to the National Development and Reform Commission and uses the structure of an official publication portal, but the real-world operator remains unverified. No licensing claim or registration number is presented in the supplied page evidence; for an informational government-style site, that is principally an identity and disclosure verification gap rather than standalone proof of fraud. The site's valid transport encryption confirms encrypted delivery, not official government ownership or authorization. The available broker-reputation dataset produced no matching record, which provides no affirmative regulatory validation.

EVIDENCE

- The homepage lists “中华人民共和国国家发展和改革委员会” and includes “Leadership,” “Organization,” “News,” and “Contact” navigation.
- Hosted on AS398823, PEG-LA - PEG TECH INC, US.
- TLS certificate issued by YR1 with DV validation, valid to 2026-10-31T05:44:37+00:00.
- The homepage contains dated policy and press-release entries, including 2018 foreign-investment and economic-policy announcements.

What to Verify Next

Before any sensitive interaction, the claimed government affiliation should be confirmed through an independently obtained official government source, such as a known-good agency website or an offline contact route. The domain should not be used for account authentication, credential submission, downloads, payments, or financial activity unless the domain's official status and technical safety have been independently established. Any downloaded material should be scanned in an isolated environment, and official contact details should be cross-checked rather than taken solely from the site.

EVIDENCE

- The homepage contains no login form, sensitive form, or untrusted form destination in the observed page structure.
- Browser testing recorded no wallet connection, external form submission, clipboard hijacking, hidden form, or suspicious inline-script activity.
- The observed page returned successfully in 2 of 2 runs and contained 773 characters of rendered text.
- The page contains no visible commercial monetization model; its stated function is publication of government news and policy updates.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the page content is internally coherent as a government-news presentation and the domain has longstanding registration continuity, the confirmed external blacklist and malicious detections create a decisive trust failure, while operator identity remains unverified.

Infrastructure Integrity

The site resolves directly to a single likely origin address and has no detected CDN or WAF layer. This provides little protective separation between the public service and its hosting environment; infrastructure stability and TLS availability should therefore be treated only as limited mitigating observations, not as evidence of legitimacy.

Closing Assessment

Enterprise controls should block or isolate the domain for sensitive use, and any required investigation should remain limited to controlled, read-only analysis until independent official-domain confirmation and security review are complete.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
----------------	--------

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 07ying5.com.

- The request stayed on 07ying5.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NameSilo, LLC. [CLEAR](#)
- DNS for this domain is served by dnsowl.com, across 3 name servers. [NOTED](#)
- The registration is paid up to 2027-06-27. [NOTED](#)
- The earliest public archive of this site is from 2021-11-23. [CLEAR](#)
- It is hosted on PEG-LA, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 07ying5.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
