

Is 0834ka.com a scam? TrustSniffer's high-risk assessment: 0/100

0834ka.com

Verdict

0

OUT OF 100

CRITICAL RISK

0834ka.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate website for Jiangsu Yunze (运泽) Steel Co., Ltd. showcasing product categories (seamless steel pipes, high-pressure pipes, alloy pipes), contact numbers, address in Wuxi, and news entries. Primary function is B2B product marketing and enquiries.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://0834ka.com/

What 0834ka.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as the corporate site of Jiangsu Yunze (Yunze) Steel Co., Ltd., a Wuxi-based B2B supplier of seamless steel pipes, high-pressure and alloy pipes, pipe fittings, and related industrial products, with product information, technical articles, telephone contacts, and enquiry-oriented business content.

Scam/Impersonation Risk

The site's apparent industrial purpose is undermined by a material content inconsistency: its page title and repeated page text contain gambling-related phrases referring to 365bet, while the visible business content describes steel products. This is a significant integrity anomaly because it may indicate compromised, repurposed, or contaminated web content, even though the available page analysis did not identify a login form, credential-harvesting mechanism, wallet activity, or confirmed brand impersonation. More importantly, external reputation checks recorded malicious detections and a confirmed blacklist status. The available evidence therefore supports a high-risk posture for sensitive interactions; the benign product catalogue does not offset the external threat signals.

EVIDENCE

- The homepage title contains repeated 365bet gambling-related wording despite the page being presented as an industrial steel-supplier website.
- The homepage body repeats the same gambling-related phrases within steel-product headings and article text.
- External reputation telemetry recorded 15 malicious and 2 suspicious detections from 22 evaluated results; Kaspersky and Sophos were among the flagged vendors.
- Archive coverage comprises 11 snapshots spanning 2014–2026, with 13 years tracked; the historical record does not by itself establish that the current operator is legitimate.

Regulatory Verification Notes

The site identifies a Chinese steel company and publishes a Wuxi address, telephone numbers, named contacts, product categories, and business enquiry information. However, the real-world operator remains independently unverified, and the available regulatory assessment is unclear. No licence claim, licensing authority, or licence number is presented in the supplied site evidence; for an industrial supplier this is a transparency and counterparty-verification issue rather than proof of fraud. The principal concern remains the conflict between the stated business identity and the gambling-related page artefacts, combined with the confirmed external reputation warnings.

EVIDENCE

- The homepage and contact content identify Jiangsu Yunze (运泽) Steel Co., Ltd., list Wuxi, China as the address location, and provide telephone and mobile contact numbers.
- The product and news sections describe seamless steel pipes, high-pressure boiler pipes, alloy pipes, chemical-fertiliser pipes, and related fittings.
- The registration record lists NameSilo, LLC as registrar; creation date 2022-09-29 and expiration date 2026-09-29.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-11-02.

What to Verify Next

Any prospective commercial engagement should first establish the supplier's legal existence, trading authority, physical premises, bank-account ownership, and product-delivery capability through independent records and an offline contact route. The quoted address and telephone contacts should be corroborated using sources not controlled by the website, and any required Chinese business registration or sector documentation should be checked with the relevant official registry. Until the gambling-related contamination and external detections are resolved, the domain should not be used for login, credential submission, or financial transactions; any necessary inspection should be limited to an isolated, read-only environment.

EVIDENCE

- The homepage exposes product and contact content but contains no login form or sensitive submission form.
- Behavioural testing recorded no external POST activity, no external XHR activity, no hidden forms, and no wallet-related execution.
- The page analysis classified the site as corporate/manufacturing and identified no embedded investment, cryptocurrency, or credential-harvesting features.

Summary Verdict

The website has a critical trust posture for enterprise engagement. Its stated industrial function is not sufficient to establish legitimacy because the site contains material content inconsistencies and is subject to confirmed external threat and blacklist signals. The operator's real-world identity is also not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by PEG-LA - PEG TECH INC in the United States, without a detected CDN or WAF layer; the direct origin exposure provides no meaningful protective mitigation. The hosting arrangement and valid TLS certificate confirm transport and network facts only, not the legitimacy of the operator or content.

Closing Assessment

Engagement should be suspended pending independent counterparty validation and resolution of the external threat findings; credentials, confidential business information, and payment details should not be submitted through this domain.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 0834ka.com.

- The request stayed on 0834ka.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NameSilo, LLC. [CLEAR](#)
- DNS for this domain is served by dnsowl.com, across 3 name servers. [NOTED](#)
- The registration is paid up to 2026-09-29. [NOTED](#)
- The earliest public archive of this site is from 2014-12-16. [CLEAR](#)
- It is hosted on PEG-LA, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 0834ka.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
