Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Chinese-language promotional landing page for an online gambling and entertainment service. It presents an “Asian top-tier online entertainment platform” claim, a deposit-based promotional offer, and branding intended to encourage visitors to fund an account and play.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External security intelligence records a confirmed blacklist status and malicious detections from multiple security providers, including Kaspersky and Sophos. The homepage also combines a 40% deposit bonus with a claim of being a “22-year” Asian brand, while providing minimal business context or supporting evidence; this is a material claim-to-evidence mismatch in a deposit-before-service model. No distinct legal-entity identity contradiction or brand-impersonation indicator was observed, but the external malicious detections and blacklist status are sufficient to make login, credential submission, and financial interaction inappropriate. Evidence:

- The homepage promotes a 40% deposit bonus and describes the service as a long-standing Asian brand, while providing only 46 characters of substantive page text.
- External reputation telemetry records 14 malicious detections and 2 suspicious detections from 21 evaluated results; Kaspersky and Sophos are among the flagged providers.
- The domain has 2 archive snapshots spanning 2025-09-15 to 2026-02-01, with 2 years tracked.

Regulatory Verification Notes

The available content does not identify a licensing authority, license number, or verifiable operating entity for the gambling service. The identity of the real-world operator remains unverified, and the landing page supplies insufficient legal, ownership, or governance information for a regulated financial or gambling engagement. A valid transport certificate and mainstream hosting arrangement establish technical reachability only; they do not validate the operator, the promotional claims, or regulatory authorization. Evidence:

- Registration records identify Spaceship, Inc. as registrar; the domain was registered in 2025 and is approximately 0.71 years old.
- The site is served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-24.

What to Verify Next

Before any interaction involving funds or account credentials, an independent check should confirm the operator's legal name and gambling authorization directly with the relevant jurisdictional licensing registry. The advertised bonus terms, withdrawal conditions, dispute process, age restrictions, and responsible-gambling controls should be obtained from authoritative documentation rather than relying on the landing-page claims. Official contact channels should be confirmed through an independent, offline route, and payment activity should not proceed unless the operator and consumer protections are independently established. Evidence:

- The homepage is classified as a landing/promotional page for gambling or online-casino activity rather than a documented corporate or regulatory portal.
- No license authority, license number, or verified licensing claim is present in the supplied site content.
- Behavioral inspection observed 4 external POST requests, including 2 non-whitelisted POST requests, while no login form or hidden sensitive form was detected.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The combination of confirmed external malicious detections, blacklist status, an unverified operator, and deposit-driven promotional content outweighs the site's limited technical positives. No evidence supports treating the website as an acceptable destination for credentials or financial activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge servers rather than an observable origin server. This reduces direct exposure of the hosting infrastructure but is only a mitigating technical control and does not establish site legitimacy.

Closing Assessment

Prospective users should not log in, submit credentials, or transfer funds through the site; any further consideration should remain limited to non-interactive review until independent operator and authorization

checks are complete.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 09py5pg.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
