

Is 1000hundred.com a scam? TrustSniffer's high-risk assessment: 0/100

1000hundred.com

Verdict

0

OUT OF 100

CRITICAL RISK

1000hundred.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Spanish-language small business site selling and distributing kitchen and industrial equipment/parts. Lists brands, product categories, contact and FAQ; appears to be a standard reseller/catalog page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 1000hundred.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

1000 Hundred is a Spanish-language e-commerce and catalogue website presenting kitchen and industrial equipment, replacement parts, brand listings, product categories, FAQs, and contact information for apparent sales and distribution to restaurants, hotels, and industrial customers.

Scam/Impersonation Risk

The website's visible content resembles a conventional reseller catalogue and does not present login forms, financial products, wallet functions, or other high-risk interaction mechanics. Its homepage identifies products such as fryers, ovens, coffee makers, bar blenders, refrigeration equipment, and replacement parts, while listing brands including Amana, Hatco, Honeywell, Robertshaw, T&S, True, and Vitamix. However, this relatively ordinary page presentation is contradicted by **confirmed blacklisting** and multiple external malicious detections, including 14 malicious and 1 suspicious determination. No conflicting legal-entity names or explicit brand-impersonation finding were observed, but the external reputation evidence creates a material risk for sensitive interaction.

EVIDENCE

- The homepage presents a kitchen-parts and industrial-equipment catalogue with no sensitive form or login workflow observed.
- External reputation checks recorded 14 malicious detections, 1 suspicious detection, and blacklist status from two sources; the domain was evaluated by Fortinet, Kaspersky, and Sophos.
- Domain registration records show registration on 2020-07-21, making the domain approximately 6.08 years old.
- Web archives contain 100 snapshots spanning 2021-11-23 through 2026-03-08, covering 6 tracked years.

Regulatory Verification Notes

The About, Brands, FAQ, and Contact pages provide a basic commercial description and identify “1000 Hundred” as the operating name, but the available material does not independently verify the real-world operator or establish a licensing or registration status. No financial-services authorization is relevant to the stated catalogue model, and no third-party broker match was identified. The registration record lists PDR Ltd. d/b/a PublicDomainRegistry.com as registrar and Milton Neil Mendoza Vazquez as registrant; these administrative records do not, by themselves, prove that the named person operates the website or is authorized to distribute the referenced brands.

EVIDENCE

- The About and Contact pages describe the business and provide customer-facing contact and FAQ routes, without an independently verified legal-entity or license identifier.
- WHOIS records list registrar PDR Ltd. d/b/a PublicDomainRegistry.com and registrant Milton Neil Mendoza Vazquez.
- The site is hosted on AS46606 (UNIFIEDLAYER-AS-1 - Unified Layer, US).
- The transport certificate is issued by YR1 at DV validation level and is valid to 2026-10-07.

What to Verify Next

Before any purchase or submission of sensitive information, an independent party should confirm the operator’s legal identity through an offline or independently sourced business channel, obtain written confirmation that the advertised brand-distribution claims are authorized, and validate payment, delivery, warranty, and returns arrangements using documentation that does not rely solely on the website. Any applicable commercial registration or sector-specific authorization should be checked with the relevant official registry, and the site’s contact channels should be confirmed through an independent route.

EVIDENCE

- The About page is the relevant location for confirming the operator's stated identity and business description.
- The Brands page is the relevant location for validating claimed distributor relationships with the named manufacturers.
- The FAQ and Contact pages are the relevant locations for checking delivery, warranty, returns, and customer-service commitments.
- The absence of a sensitive form or login workflow on the homepage does not validate the operator or commercial terms.

Summary Verdict

The overall posture is **critical trust risk**, driven by a decisive conflict between the site's conventional catalogue presentation and confirmed external malicious and blacklist detections. The available evidence does not support treating the website as suitable for sensitive interaction, even though its visible content contains no obvious phishing form or high-risk financial mechanism.

Infrastructure Integrity

The site resolves through Unified Layer hosting without a detected CDN or WAF, and the observed address is consistent with a directly exposed hosting endpoint rather than a protected edge service. The valid DV certificate provides transport encryption, but infrastructure configuration is only a mitigating technical characteristic and does not resolve the external reputation conflict.

EVIDENCE

- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN vendor was detected, and `has\_cdn` was false.
- The hosting infrastructure is registered in the United States through ARIN.

Closing Assessment

Prospective users should restrict activity to non-sensitive inspection until the operator, commercial terms, brand authorization, and payment protections have been independently validated; credentials, payment details, and other sensitive information should not be submitted in the interim.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1000hundred.com.

- The request stayed on 1000hundred.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by supremo-c155.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-21. NOTED
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1000hundred.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
