What 100yearsconstruction.co.uk served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents 100Years Construction Ltd as a London-based residential construction and refurbishment contractor, offering services such as loft conversions, full-house refurbishments, bespoke building work, free quotations, and client contact through telephone and email.

Scam/Impersonation Risk

Confirmed external reputation contradictions make this a high-risk website for sensitive interaction. External checks recorded multiple malicious detections and a confirmed blacklist status, which materially outweigh the otherwise ordinary construction-business presentation. The homepage and observed site behavior do not show a login form, hidden sensitive form, wallet activity, or apparent brand impersonation; however, the absence of page-level indicators does not resolve the external threat findings. No separate conflicting legal identities were observed. The site's apparent identity should therefore be treated as unverified for security-sensitive or financial purposes.

EVIDENCE

- The homepage identifies “100Years Construction Ltd” and presents residential construction services, but page-level analysis recorded no phishing or brand-impersonation indicators.
- External reputation telemetry recorded 6 malicious detections and 1 suspicious detection, with confirmed blacklist status.
- The domain was registered on 2021-06-03 and is approximately 5.21 years old.
- Archive records contain 389 snapshots spanning 2021-11-22 to 2026-02-24, covering 6 tracked years.

Regulatory Verification Notes

The reviewed content describes construction and refurbishment services and claims “Experienced and Certified Professionals,” “Commitment to Safety and Industry Standards,” transparent pricing, and free quotations. Those statements are business claims rather than independent evidence of certification, licensing, insurance, or corporate authorization. No licensing authority or license number is presented in the supplied site content, leaving a material disclosure gap that should be resolved independently. The apparent operator identity is plausible but not independently verified, and the external blacklist status prevents the site’s ordinary presentation from supporting a reassuring legitimacy conclusion. No relevant broker-dataset match was identified, but that contextual result is not a regulatory determination.

EVIDENCE

- The homepage and services content describe loft conversions, full-house refurbishments, bespoke construction, and project-based client fees.
- The reviewed navigation exposes Home, Our Services, Portfolio, and Contact; the supplied content contains no license number or licensing-authority disclosure.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The site’s TLS certificate is issued by WE1 at DV validation level and is valid to 2026-09-23.

What to Verify Next

Before any contract, deposit, identity disclosure, or other sensitive engagement, an independent party should confirm that the named construction company, address, telephone number, certifications, insurance, and relevant business registration correspond to the same real-world operator. The external blacklist findings should also be validated through the organization’s security or fraud team before the domain is permitted for business interaction. Contact details should be confirmed through an independently sourced route rather than relying solely on the website, and any quotation should be supported by a formal contract with clear payment protections and dispute terms.

EVIDENCE

- The Contact page supplies a telephone contact, email contact, and physical address for the business.
- The homepage offers free quotations and invites prospective customers to initiate a project relationship.
- The observed site contained no login form, password-collection form, wallet connection, or external sensitive form.
- Social links point to Facebook and Instagram, providing additional channels for independent business verification.

Summary Verdict

The overall trust posture is critical and unsuitable for sensitive interaction. Although the website presents a coherent local-service business model and has a plausible apparent identity, the confirmed external reputation contradictions require the domain and its operator to be treated as untrusted until independently resolved.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF protection, and all four observed addresses were Cloudflare edge servers rather than an independently visible origin. This infrastructure can mitigate direct exposure and improve delivery resilience, but it is only a protective technical layer and does not establish the legitimacy of the operator or offset the reputation findings.

Closing Assessment

Access should be limited to non-sensitive review while independent company, contact, and reputation checks are completed; credentials, deposits, payment details, and other sensitive information should not be submitted through the site in the interim.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 100yearsconstruction.co.uk.

- The request stayed on 100yearsconstruction.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc.. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-06-03. NOTED
- The earliest public archive of this site is from 2021-11-22. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 100yearsconstruction.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals

were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
