Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Romanian online florist offering bouquets, floral arrangements, gift products, and delivery services in Bucharest, Ilfov, and nationwide, with a conventional retail model built around product selection, cart checkout, and paid delivery.

Scam/Impersonation Risk

No contradictions were observed between the site's stated business, its page structure, and the available technical and reputational evidence. The homepage presents a coherent florist retail operation with product categories, delivery information, contact details, and standard account and checkout functions; the login form is part of that ordinary ecommerce flow rather than an identified phishing or impersonation mechanism. External reputation checks found no malicious or suspicious detections, and observed browser behavior showed no cloaking, hidden forms, wallet activity, credential exfiltration, or other high-risk abuse pattern. The site therefore presents a low apparent scam or impersonation risk, while the real-world operator remains only apparently connected to the website rather than independently verified.

EVIDENCE

- The homepage is categorized as an ecommerce florist site and contains product listings, delivery information, cart functionality, checkout, and contact details; no content red flags were identified.
- The login and checkout forms observed on the homepage did not submit to an untrusted destination, and no hidden forms or external password submissions were detected.
- The domain was registered in 2012 and is approximately 14.25 years old.
- The site has 221 archive snapshots spanning 2012–2026, with 15 years tracked and a maximum observed gap of 1 year.

Regulatory Verification Notes

The site provides company-registration information and presents ordinary consumer-facing terms, delivery, payment, contact, and about content. No regulated financial, investment, or other licensed activity is indicated, and no regulated license claim or license number is identified; this is a disclosure item to confirm where relevant to the merchant relationship, not evidence of deception. The apparent business identity is supported by the consistency of the commercial pages, published contact details, social links, long-running domain history, and clean external reputation, but those signals do not independently prove the legal operator. The domain is registered through ICI - Registrar, and its transport security uses a valid domain-validated certificate issued by YE2.

EVIDENCE

- The homepage and contact content identify a Romanian florist business, publish a telephone contact channel, and provide company-registration details.
- The terms, delivery, payment, and about pages are linked from the site's primary navigation.
- The site is hosted on AS5606, GTS-BACKBONE - GTS Telecom SRL, RO.
- TLS certificate: issuer YE2; validation level DV; valid through 2026-10-15.

What to Verify Next

Before credential or payment interaction, an organization should independently confirm the merchant identity and company-registration details through the applicable Romanian registry or an established offline contact route. The terms and conditions should be reviewed for cancellation, substitution, delivery-failure, refund, and complaint procedures, while the checkout should be checked for the final merchant name, payment recipient, transaction currency, and available payment protection. Any material order should use a payment method offering an appropriate dispute or chargeback process.

EVIDENCE

- The site exposes a terms-and-conditions page, delivery-information page, payment-information page, contact page, and checkout flow.
- The business model states that orders may be paid online or on delivery.
- The site publishes a telephone contact channel and links social-media profiles that can be compared with independently sourced business information.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website operating a conventional florist ecommerce business. Its high-trust, low-risk posture is supported by coherent site content, sustained historical continuity, clean reputation indicators, and stable technical operation, although the real-world operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to one hosting IP in Romania and does not use a detected CDN or WAF edge layer. Hosting is provided by GTS-BACKBONE - GTS Telecom SRL on AS5606; this direct infrastructure is not itself suspicious, but it provides fewer protective layers than a mainstream CDN/WAF deployment.

Closing Assessment

Normal browsing is proportionate to the assessed posture, while independent merchant-identity, returns, and payment-protection checks should be completed before submitting credentials or making a payment.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 101flori.ro.

- The request stayed on 101flori.ro. It was not redirected to another domain. CLEAR
- Registration is published under ICI - Registrar. CLEAR
- DNS for this domain is served by hostx.eu, across 2 name servers. NOTED
- The earliest public archive of this site is from 2012-07-23. CLEAR
- It is hosted on GTS-BACKBONE, from a server in RO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 101flori.ro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
