

Is 102rota.ru safe? TrustSniffer's low-trust assessment: 40/100

102rota.ru

Verdict

40

OUT OF 100

LOW TRUST

102rota.ru is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Official site of an airsoft team in Volgograd (СК «102 рота») with informational pages about the team, history, modeling/reconstruction and membership; no evident financial schemes or credential-harvesting elements.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://102rota.ru/>

What 102rota.ru served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is an informational site for the Volgograd airsoft team CK «102 рота», presenting the team's history, military-style reconstruction activities, event archives, membership information, and an introduction to airsoft as a team-based recreational sport.

Scam/Impersonation Risk

A **confirmed blacklist hit** is present and constitutes a material contradiction to the otherwise benign presentation. The homepage and membership content show no evident financial solicitation, credential-harvesting mechanism, login form, or payment flow, and no brand impersonation is indicated in the supplied page analysis. However, the site's informational appearance does not neutralize the external blacklist finding. Separate abuse reporting concerns the observed IP address rather than the website directly; that reporting is attributed to shared infrastructure, marked as whitelisted, and carries zero confidence, so it is treated as a contextual rather than site-specific finding. The available evidence therefore supports a high-risk posture for sensitive interaction despite the absence of overtly malicious page mechanics.

EVIDENCE

- The homepage identifies the site as the official website of CK «102 porta», a Volgograd airsoft team, and describes team history, events, reconstruction, and membership.
- Domain registration records show creation on 2012-12-21T01:11:03Z, making the domain 13.67 years old; registrar: RD-RU.
- Historical records show 102 archive snapshots from 2014-05-17T00:58:35Z through 2026-05-16T07:40:57Z, covering 13 years.
- External reputation telemetry records a confirmed blacklist hit for the domain; 77 abuse reports are associated with IP 199.36.158.100, attributed to shared CDN infrastructure with a confidence score of 0.

Regulatory Verification Notes

The apparent business model is a local recreational club rather than a financial or otherwise evidently regulated service, and the supplied pages do not present a licensing claim or license number. The real-world operator identity remains unverified, while ownership and governance disclosures are unclear in the available site material. This is a transparency and verification issue, not an identity contradiction: the supplied content presents one team identity and does not show conflicting legal-entity names. A valid transport certificate and established domain history support technical continuity, but neither establishes the operator's legal identity or regulatory standing.

EVIDENCE

- The homepage and "About the Team" material describe CK «102 porta» as an airsoft team and provide historical and membership information rather than a regulated financial service.
- The available site content contains no stated licensing authority or license number.
- The domain is served from AS54113 (FASTLY - Fastly, Inc., US).
- The TLS certificate is issued by WR3 at DV validation level and is valid to 2026-10-08T23:48:13+00:00.

What to Verify Next

Before any sensitive interaction, an independent contact route should be used to confirm that the domain is currently operated by the airsoft team described on the site. Any proposed membership payment, donation, event fee, or request for personal information should be checked against independently confirmed club details and a payment method offering appropriate dispute protection. The current blacklist status should also be resolved through an independent security review before the domain is permitted for credential use or other sensitive activity.

EVIDENCE

- The "Join the Team" page describes membership engagement but the captured analysis identified no sensitive form or login mechanism.
- The homepage, history, and membership sections provide the substantive club description but do not independently establish a legal operator.
- Behavioral testing recorded 2 successful runs, with no hidden forms, wallet connections, password forms, or clipboard-hijacking activity observed.

Summary Verdict

The website presents as a longstanding local hobby-club information site, but the confirmed blacklist contradiction and unverified operator identity make its overall trust posture low for sensitive interaction. Public browsing may explain the site's apparent purpose, but the available evidence does not support treating the domain as cleared for credentials, payments, or other consequential engagement.

Infrastructure Integrity

The site is protected by Fastly's CDN/WAF infrastructure, and the observed address was a CDN edge address rather than an identified origin server. This architecture reduces direct exposure of the origin and is a mitigating technical control, but it cannot validate the site's ownership or offset the external reputation finding.

Closing Assessment

Prospective users should limit engagement to public informational review until the domain's reputation and operating identity have been independently cleared; credentials, payments, and other sensitive actions should not be undertaken on the basis of the site's presentation alone.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 77 reports on hosting IP 199.36.158.100 (Google LLC, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 102rota.ru.

- The request stayed on 102rota.ru. It was not redirected to another domain. CLEAR
- Registration is published under RD-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2026-12-21. NOTED
- The earliest public archive of this site is from 2014-05-17. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 102rota.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
