

Is 1056915.com a scam? TrustSniffer's high-risk assessment: 0/100

1056915.com

Verdict

0

OUT OF 100

CRITICAL RISK

1056915.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 60%.

What this site appears to be

Landing page for an online betting/gambling platform that heavily promotes deposits, large signup/download bonuses, use of third-party wallets (USDT/virtual wallets), and uses the BET365 brand name and variants. Contains promotional guarantees and unverifiable claims; appears to impersonate an established bookmaker and solicits financial transactions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 1056915.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an online betting and gambling platform presenting sports wagering, casino-style games, lotteries, live entertainment, promotional bonuses, account registration, deposits, withdrawals, and agent/referral participation. Its apparent business model is to attract users to deposit funds and wager through advertised payment channels, including third-party wallet and USDT-related services, while using the BET365 name and variants in its promotional content.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External security intelligence recorded malicious detections and confirmed blacklist listings from multiple sources; this is a material contradiction that outweighs the site's ordinary technical availability. The homepage also uses BET365 branding and variants while soliciting deposits, app downloads, wallet payments, and wagering, creating an apparent brand-association concern that is not independently substantiated by the supplied evidence. Promotional statements such as “highest odds,” large cash-rebate campaigns, guaranteed wallet compensation, and “100%” transaction success are not

supported by evidence on the page and are inconsistent with the financial exposure created by deposit-before-service mechanics. The homepage publishes the contact address `bet365uu@gmail.com`, an apparent contact-channel integrity anomaly caused by a deliverability-breaking or potentially typosquatted domain ending. No separate identity inconsistency between two legal entities was established.

EVIDENCE

- The homepage promotes betting, deposits, withdrawals, app downloads, referral activity, and third-party wallet payments while using BET365-related branding.
- External reputation checks recorded 19 malicious detections from 24 evaluated results and a confirmed blacklist status.
- The domain was registered in 2025 and is approximately 1.03 years old.
- The available archive record contains 2 snapshots, with 1 year tracked from 2026 to 2026.

Regulatory Verification Notes

The site's legal and regulatory position remains unclear from the supplied page evidence. The business-model record contains no claimed license authority or license number, so authorization to provide gambling services, process deposits, or operate referral arrangements cannot be established from the website. This is a regulatory-disclosure gap rather than a standalone finding of fraud, but it is significant when combined with the deposit-based model and external threat detections. Registration is recorded through GoDaddy.com, LLC; the technical record identifies hosting through MOACKCOLTD-AS-AP, MOACK.Co.LTD, KR. The site uses domain-validated TLS, which confirms encrypted transport but does not validate the operator, gambling authorization, or BET365 affiliation.

EVIDENCE

- The homepage offers gambling and payment services without a displayed license authority or license number in the supplied business-model evidence.
- The domain registrar is GoDaddy.com, LLC.
- The site is served from AS138195, MOACKCOLTD-AS-AP - MOACK.Co.LTD, KR.
- The TLS certificate is issued by YR2 at DV validation level and is valid to 2026-09-06T02:34:20+00:00.

What to Verify Next

Before any sensitive interaction, an independent review should confirm the operator's legal entity and the applicable gambling license directly with the relevant jurisdictional regulator. Any proposed payment route should be validated through an independently sourced financial-services contact, and the official relationship between the website and the BET365 brand should be confirmed through an established brand-owned channel. Existing passwords should not be reused on the site, and no deposit, wallet transfer, app installation, or credential submission should occur unless those checks produce authoritative confirmation.

EVIDENCE

- The homepage's deposit, withdrawal, wallet, and app-download functions create direct financial and device-exposure points requiring independent confirmation.
- The site's legal-status disclosure is insufficient in the supplied page evidence to establish regulated operation.
- The external security record includes confirmed blacklist status and malicious detections, requiring validation through channels not controlled by the website.

Summary Verdict

The website has a critical trust posture and should be treated as unsuitable for login, credential submission, or financial interaction. The combination of confirmed external threat indicators, apparent brand misuse, deposited gambling mechanics, unsupported promotional assurances, and unverified operator identity provides a clear basis for the adverse assessment.

Infrastructure Integrity

The available technical record confirms identifiable hosting and encrypted transport, but it does not establish a protective CDN or WAF mitigation posture. These infrastructure characteristics should therefore be treated as operational details, not as evidence that the site or its transactions are legitimate.

Closing Assessment

The appropriate enterprise disposition is to block sensitive interaction and escalate any attempted payment, credential request, or brand-representative contact for independent investigation.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1056915.com.

- The request stayed on 1056915.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- The earliest public archive of this site is from 2026-02-19. CLEAR
- It is hosted on MOACKCOLTD-AS-AP, from a server in KR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1056915.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
