

Is 1073.co.jp safe? TrustSniffer's low-trust assessment: 30/100

1073.co.jp

Verdict

30
OUT OF 100

LOW TRUST

1073.co.jp is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Website for Bodyshop TONAMI (ボディショップ豊南) in Aichi Prefecture offering vehicle repair, dent repair, painting, and body coating services with free estimates, contact phone, and information about services and company.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://1073.co.jp/>

What 1073.co.jp served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents itself as Bodyshop TONAMI, a local automotive repair business in Toyohashi, Aichi Prefecture, offering dent repair, bodywork, painting, vehicle inspections, repairs, body coating, free estimates, towing support, and loaner vehicles. Its apparent business model is direct local payment for vehicle repair and related services.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material trust contradiction despite the site's otherwise ordinary local-service presentation. The homepage contains no apparent login form, credential-harvesting mechanism, hidden sensitive form, cryptocurrency feature, or brand-impersonation indicator, and the page-level content describes a conventional auto-repair operation rather than an inherently abusive service. This evidence does not by itself establish that the business is fraudulent, but the confirmed blacklisting warrants a clearly restrictive posture for sensitive interactions. No identity contradiction was observed because the available pages do not present multiple conflicting legal-entity names.

EVIDENCE

- The homepage identifies Bodyshop TONAMI and describes body repair, painting, coating, inspections, repairs, free estimates, towing, and loaner-vehicle support.
- External reputation analysis records a confirmed blacklist hit, with one malicious and one suspicious detection among the evaluated results.
- Historical archive records show 51 snapshots spanning 2004–2026, with 23 years tracked; the archival record does not indicate suspicious repurposing or semantic drift.
- The registration record dates to 2021-08-16 and reports an age of approximately 5.01 years.

Regulatory Verification Notes

The company-information and homepage content provide a business name, locality, service description, telephone contact, and a privacy-policy link, but the operator's real-world identity remains unverified. The site does not present a claimed license, licensing authority, or license number in the supplied content; for a local repair business this is a transparency and verification matter rather than standalone evidence of a scam. The external broker dataset contains no match, but that is only contextual reputational information and does not establish legal status. The site's transport security is valid, although domain-validated TLS confirms encrypted delivery rather than operator identity.

EVIDENCE

- The company-information content identifies Bodyshop TONAMI in Aichi Prefecture and describes the business as providing automotive repair and related services.
- The site content contains no stated license authority or license number.
- The site is served from AS131965, XSERVER - Xserver Inc., JP.
- TLS uses issuer YR2 with DV validation and is valid to 2026-11-01.

What to Verify Next

Before any sensitive or payment-related interaction, an independent party should confirm that Bodyshop TONAMI's name, physical business details, telephone contact, and service offering correspond to an independently sourced local business record. Any required automotive-service, inspection, or repair authorization should be checked with the relevant Japanese authority or industry registry rather than relying solely on the website. Official contact channels should also be confirmed through an independent, offline route, and payment arrangements should provide ordinary consumer protections.

EVIDENCE

- The homepage provides the business name, Toyohashi/Aichi location, telephone contact, and local repair-service description for independent comparison.
- The site includes company-information, privacy-policy, contact, and free-estimate functions that can be reviewed against independently obtained business details.
- The available technical evidence shows a functioning HTTPS site, but the certificate is DV-only and therefore does not validate the operator's legal identity.

Summary Verdict

The website has a conventional local-business appearance and substantial benign page content, but the confirmed external blacklisting and unverified operator identity produce a **low-trust posture with elevated risk for sensitive interaction**. The available evidence supports treating the site as unconfirmed rather than as an established and independently validated business identity.

Infrastructure Integrity

The site resolves directly to a single hosting address on XSERVER infrastructure in Japan, with no detected CDN or WAF layer and no separate edge-IP posture. This provides limited infrastructure-based mitigation and should not be interpreted as evidence of legitimacy.

Closing Assessment

Interaction should remain limited to non-sensitive, read-only review until the business identity, relevant authorizations, and payment arrangements have been independently confirmed; credentials and financial actions should not be submitted in the interim.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1073.co.jp.

- The request stayed on 1073.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by xserver.jp, across 5 name servers. NOTED
- The earliest public archive of this site is from 2004-05-26. CLEAR
- It is hosted on XSERVER, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1073.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
