Full analysis

Overview

This French-language website presents itself as an affiliate comparison and review service for offshore online casinos accessible from France, emphasizing mobile compatibility, welcome bonuses, payment methods including cryptocurrency, foreign licensing information, and responsible-gambling guidance. Its apparent business model is referral-based, with affiliate commissions disclosed when visitors follow links to listed operators.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External reputation checks recorded a blacklist hit together with multiple malicious and suspicious detections; this is a direct contradiction to treating the domain as a trusted destination, even though no specific brand impersonation or conflicting legal-entity identity was identified. The homepage promotes unusually large offers, including 450% bonuses up to €5,000, 800% bonuses up to €10,000, 200% up to \$30,000, free spins, cashback, and one offer described as having no

wagering requirement. The comparison model directs users toward gambling operators before any service is received, and the analysis identified evidence gaps around high-stakes claims, crypto payment handling, and the flow of value through referrals. The site's own warnings that the listed casinos operate outside the French regulatory framework do not neutralize these interaction risks.

EVIDENCE

- The homepage lists offshore casino operators with bonus claims including 450% up to €5,000, 800% up to €10,000, and 200% up to \$30,000.
- The homepage and comparison content direct visitors toward third-party casino deposits and payment methods, including cryptocurrency.
- External reputation checks recorded 2 malicious detections, 2 suspicious detections, and a blacklist hit for the domain.
- Archive records show 409 snapshots spanning 2021–2026, with 6 years tracked.

Regulatory Verification Notes

The website's legal and informational pages provide some relevant disclosure: the homepage states that the promoted casinos operate under foreign licences outside the framework of France's ANJ, and the site includes About Us, Terms and Conditions, Contact Us, and Responsible Gambling pages. It also discloses an affiliate-commission relationship. However, the available material does not independently establish the operator's identity or provide a verified licence or registration reference for the comparison service itself. The site should therefore be treated as promotional affiliate content rather than as a regulated gambling operator or regulatory authority. No matching third-party broker profile was identified, but that is contextual information and not a licensing determination.

EVIDENCE

- The homepage describes the service as a comparison of offshore casinos and expressly states that they are outside the ANJ framework.
- The About Us, Terms and Conditions, Contact Us, and Responsible Gambling pages are present.
- The site discloses affiliate commissions associated with referrals to listed operators.
- The site's transport encryption uses a DV certificate, which authenticates encrypted transport but does not establish regulatory status or operator identity.

What to Verify Next

Before any account creation, deposit, or referral interaction, the relevant French regulatory position and each individual casino's claimed licence should be checked directly with the applicable official registry or regulator. The terms for bonus eligibility, wagering, withdrawals, disputes, and geo-restrictions should be reviewed on the destination operator's own legal pages rather than relying on the comparison summaries. Payment protections, chargeback availability, cryptocurrency irreversibility, and the independent validity of the site's contact channels should also be established through authoritative or offline sources.

EVIDENCE

- The homepage provides operator comparisons and bonus descriptions but does not itself establish a verified licence for the comparison service.
- The Terms and Conditions and Responsible Gambling pages identify the site's stated governance and user-protection framework for review.
- The listed operators' own terms and licence records are the appropriate sources for withdrawal, wagering, and jurisdiction checks.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for treating the website as a trusted venue for credentials, deposits, or other sensitive financial interaction. Its informational content and stated disclosures do not outweigh the contradiction-based reputation findings and the unresolved identity and governance concerns.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF, and the observed addresses are CDN edge infrastructure rather than independently exposed origin infrastructure. This provides a mitigating layer against direct network exposure but is not evidence of legitimacy; the valid certificate similarly supports encrypted transport only.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US); observed edge IP 104.21.27.97.
- TLS certificate issued by WE1 (DV), valid to 2026-11-09T15:07:51+00:00.
- Four observed IP addresses were Cloudflare edge addresses, with 0 likely origin IPs identified.

Closing Assessment

Prospective users should restrict activity to passive review and independently validate the relevant counterparties, licensing, payment protections, and official contact channels before undertaking any account, deposit, or other financial action.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 10kstartups-pour-changer-le-monde.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals

were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
