

Is 1111365.vip a scam? TrustSniffer's high-risk assessment: 0/100

1111365.vip

Verdict

0

OUT OF 100

CRITICAL RISK

1111365.vip shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Chinese-language gambling aggregator landing page promoting sports betting, live dealer games, slots and casino products with prominent deposit bonuses and registration CTAs; minimal verifiable licensing or contact evidence present in the provided content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 1111365.vip served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Chinese-language gambling and casino promotion portal presenting sports betting, live-dealer games, slots, lottery and related wagering offers, with registration and deposit-driven promotions as its apparent operating model.

Scam/Impersonation Risk

The site presents several material risk indicators. Its homepage claims to be an official 2026 World Cup sponsor and promotes assurances such as “safe,” “正规” and “trusted,” while also advertising 100% new-user bonuses up to RMB 18,888, fast withdrawals, high rebates and a purported “13-year” brand history without corresponding evidence in the supplied content. The deposit-before-service model, aggressive promotional claims and limited supporting detail create substantial exposure for users considering registration or payment. External security intelligence records malicious detections and a confirmed **blacklist** status, including detections associated with Kaspersky and Sophos. The available evidence does not establish a separate identity contradiction or brand-impersonation finding, but the security detections alone warrant a clearly cautionary posture.

EVIDENCE

- Homepage: advertises sports betting, live video, electronic games, lottery, poker, esports and fishing entertainment, alongside registration and deposit promotions.
- Homepage: claims official 2026 World Cup sponsorship and promotes “100%” bonuses up to RMB 18,888, fast withdrawals and a purported 13-year operating history.
- External reputation assessment: 17 malicious detections were recorded, with Kaspersky and Sophos among the flagged vendors; blacklist status was confirmed by two external sources.
- Archive record: 32 snapshots from 2021-11-23 through 2024-07-21, covering 4 tracked years; the record does not establish that the current gambling presentation is operated by a verified real-world entity.

Regulatory Verification Notes

The available page content does not present a licensing authority or license number for the gambling services. The footer links to About, Privacy Policy, Terms, FAQ, Contact and Agent Cooperation pages, but the supplied material describes the licensing and contact evidence as minimal and does not provide independently verifiable operator credentials. This is a material regulatory-transparency gap for a deposit-based wagering service, separate from the confirmed security-reputation issue. A valid domain-level TLS certificate and mainstream registrar infrastructure are positive technical controls, but they do not validate licensing or the operator’s identity.

EVIDENCE

- Homepage and footer: provide links to About, Privacy Policy, Terms, FAQ, Contact and Agent Cooperation pages, with no license authority or license number shown in the supplied content.
- Domain registration record: registered through Spaceship, Inc. on 2026-06-30; recorded age 0.13 years; expiration 2027-06-30.
- Hosting and transport: served through AS13335, CLOUDFLARENET—Cloudflare, Inc.; TLS certificate issued by WE1 at DV validation level, valid to 2026-09-29.
- Third-party broker context: no matching broker record was identified; this does not constitute a licensing or regulatory determination.

What to Verify Next

Before any sensitive interaction, an institution should confirm the operator and gambling authorization directly with the relevant jurisdictional regulator, using the legal-entity name and license details obtained independently rather than relying solely on the site. Contact channels should be confirmed through an offline or independently sourced route, and any payment arrangement should be assessed for chargeback, escrow or other consumer protections before funds are transferred. Network behavior should also be reviewed in a controlled environment because the browser assessment recorded extensive external communications and a suspicious-network classification.

EVIDENCE

- Legal and identity pages: should be checked for a named legal entity, governing jurisdiction, license authority, license number, responsible-gambling terms and withdrawal conditions.
- Browser assessment: recorded 84 external XHR requests, 2 external POST requests and a maximum external-activity proportion of 94.9%.
- Browser assessment: identified 84 non-whitelisted external XHR requests and 2 non-whitelisted external POST requests across 2 successful runs.

Summary Verdict

The overall posture is **critical trust risk**, with the evidence supporting a sensitive-interaction-risk classification rather than a trustworthy service assessment. The combination of confirmed blacklist status, malicious detections, deposit-oriented promotion and unverified operator identity is not offset by ordinary transport encryption or stable web delivery.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer for edge delivery and network exposure, but all observed addresses were CDN edge addresses and no origin candidate was identified. The site resolved through Cloudflare's AS13335 infrastructure in the United States; this infrastructure characteristic does not establish legitimacy and may limit independent assessment of the hosting environment.

Closing Assessment

The appropriate institutional posture is to restrict activity to passive observation and prevent login, credential submission or financial transfers until independent security, operator-identity, licensing and payment-protection checks have been completed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1111365.vip.

- The request stayed on 1111365.vip. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-30. NOTED
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1111365.vip at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
