What 111producciones.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

111 Producciones is a Peruvian audiovisual production company website presenting film, television, advertising, and digital-content services, including locations, logistics, casting, equipment, accommodation, production support, projects, team information, and contact facilities; its apparent business model is client-funded production and commissioned media work.

Scam/Impersonation Risk

The site content itself is consistent with a corporate audiovisual-services business and does not present login functionality, financial solicitation, credential collection, cryptocurrency activity, or apparent brand impersonation. However, this benign page profile is materially outweighed by confirmed external threat detections and blacklist status, including six malicious detections and a Tier-1 security-provider flag. No separate identity contradiction or page-level impersonation indicator was observed, but the external reputation evidence creates a clear risk of sensitive interaction and prevents the website from being treated as trustworthy for credentials, account access, or financial activity.

EVIDENCE

- The homepage describes audiovisual production services for cinema, television, advertising, and digital platforms, with no financial or credential-harvesting offer.
- The contact area contains one ordinary contact form; behavioral inspection recorded no login form, hidden form, password submission, wallet connection, or clipboard activity.
- The domain was registered on 2016-03-11 and is 10.44 years old; archival records show 54 snapshots spanning 2017-10-01 through 2026-05-16 across 10 tracked years.
- External reputation assessment recorded 6 malicious detections, a Tier-1 threat detection, and confirmed blacklist status from two sources.

Regulatory Verification Notes

The website presents an identifiable apparent business profile through its company description, service catalogue, production portfolio, team biographies, office information, telephone contact, and links to social and video platforms. The supplied content does not show a licensing claim or registration number; for an audiovisual production company this is a regulatory and contracting transparency point to validate rather than evidence of a scam. The available identity linkage is only likely, not independently verified, and the confirmed external reputation warnings remain the controlling concern. A local broker-reputation dataset produced no match, but that result has no legal or licensing significance.

EVIDENCE

- The homepage, projects, locations, team, news, and contact sections identify “111 Producciones” as a Peruvian production business and describe client-service activities.
- No license authority or license number is claimed in the supplied site analysis.
- The domain is hosted on AS32475, identified as SINGLEHOP-LLC - Internap Holding LLC, US.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-10-11.

What to Verify Next

Before any commercial engagement, independently confirm that the company named on a contract, invoice, and payment account matches the business represented by the site. Confirm the listed office and telephone details through an offline or independently sourced channel, and validate that the linked social and video profiles are controlled by the same production business rather than merely linked from the website. Any licensing, tax, contracting, or payment documentation relevant to the proposed production should be checked with the appropriate Peruvian authority or counterparty before funds or sensitive information are exchanged.

EVIDENCE

- The contact page provides office addresses and a telephone number suitable for independent confirmation.
- The team and projects pages provide business-specific references that can be reconciled against external company records and counterparties.
- The site links to Facebook, Instagram, and Vimeo profiles that should be checked for consistent ownership and history.
- The contact form is non-sensitive in design, but the confirmed external reputation warnings warrant independent validation before information or payment exchange.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the website has a coherent corporate presentation, the confirmed external threat and blacklist signals dominate the assessment, while the real-world operator remains only likely rather than independently verified.

Infrastructure Integrity

The site resolves to a single likely origin address, with no CDN detected and no identified WAF or edge-IP layer. This provides less architectural separation between the public service and its hosting environment; valid transport encryption is a mitigating technical control, but it does not offset the external reputation risk.

EVIDENCE

- Infrastructure resolution identified 1 unique IP, with 0 edge IPs and 1 likely origin IP.
- No CDN was detected in the supplied infrastructure assessment.
- The resolved hosting environment is in the US and is associated with the stated Internap/SINGLEHOP infrastructure.

Closing Assessment

Sensitive actions should be deferred until independent business-identity, contact-channel, and transaction checks are completed; routine browsing of publicly available content presents materially less exposure than credential, payment, or confidential-information exchange.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
--------	--------

Identity score	76/100
----------------	--------

Identity verification confidence	38%

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 111producciones.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
