Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a small Brazilian auto-parts and vehicle-accessories retailer presenting product listings, a photo gallery, store-location information, telephone contacts, and a physical business address for local sales and in-person or direct-order enquiries.

Scam/Impersonation Risk

Contradictory security evidence is present and warrants a high-risk posture for sensitive interaction.

The domain is blacklisted in external reputation records, with multiple security-vendor detections indicating malicious activity; this outweighs the otherwise ordinary retail presentation. No brand impersonation or conflicting legal-entity names were observed, and the supplied page analysis found no login form, credential-harvesting mechanism, payment flow, or suspicious browser behavior. The site's established registration and historical continuity provide provenance context but do not neutralize the current blacklist status.

EVIDENCE

- The external reputation assessment recorded 12 malicious detections and 1 suspicious detection from 18 evaluated results; a blacklist status was also recorded.
- The homepage and contact content describe local auto-parts retail, with no login form, sensitive form, or payment flow detected.
- Archive records contain 46 snapshots spanning 2013–2025, covering 13 tracked years; no suspicious repurposing or semantic category drift was identified.
- Domain registration evidence records creation on 2009-10-21 and an age of 16.84 years.

Regulatory Verification Notes

The site presents itself as “113 Acessórios e Suspensões” and publishes a physical address, telephone numbers, store-related content, and a footer copyright notice. These on-site statements support an apparent local retail identity but do not independently verify the legal operator. No licensing claim, licensing authority, or registration number is presented in the supplied material; for an ordinary auto-parts retailer this is a disclosure and verification matter rather than proof of misconduct. The available external broker-reputation context contains no matching record, but that signal is not a legal or licensing determination.

EVIDENCE

- The homepage identifies the business as “113 Acessórios e Suspensões” and provides the address Rodovia RSC 453, N 26261, KM 148, Sala C, B. São Ciro, Caxias do Sul, RS.
- The contact and footer content publish telephone numbers and a 2018 copyright notice, but no license number or licensing authority.
- The site is hosted on AS31898, ORACLE-BMC-31898 – Oracle Corporation, US.
- The site's TLS certificate is DV, issued by YR1, and valid until 2026-10-28T02:34:50+00:00.

What to Verify Next

Before any sensitive engagement, the business identity and transaction channel should be confirmed independently using the published physical address and telephone details, rather than relying solely on the website. Any proposed payment, bank-transfer instruction, or account-related request should be matched to independently obtained business records and payment-protection options. If a regulated service is later offered, the relevant Brazilian registry should be checked directly for the named operator and activity.

EVIDENCE

- The supplied HTML contains product and contact information but no checkout, payment, account-login, or credential-submission workflow.
- The homepage includes a “Como Chegar” location element, although the embedded map reports a loading error.
- The site publishes multiple telephone contacts and a physical store address suitable for independent confirmation.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The website has a plausible local-retail presentation and meaningful historical continuity, but the confirmed external reputation contradictions dominate the assessment. Identity remains apparent rather than independently verified, so the site should not be treated as a trusted basis for credential, payment, or other financially consequential activity.

Infrastructure Integrity

The site resolves directly to a single likely origin address hosted by Oracle Corporation in the United States, with no CDN or WAF identified and no separate edge-IP layer observed. This infrastructure is technically identifiable but provides no protective mitigation against the reputation findings.

Closing Assessment

Interaction should be limited to passive review until the business and any proposed transaction channel have been independently authenticated; credentials and financial transactions should not be submitted through the site.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 113acessorios.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
