

Is 11stom.by safe? TrustSniffer's low-trust assessment: 40/100

11stom.by

Verdict

40

OUT OF 100

LOW TRUST

11stom.by is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Official site of the 11th City Clinical Dental Polyclinic in Minsk. Provides clinic description, services list, prices, contact numbers, addresses, working hours, online consultation instructions and notices for patients.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 11stom.by served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents itself as the site of the 11th City Clinical Dental Polyclinic in Minsk, offering descriptions of dental services, prices, patient guidance, appointment requests, contact information, and clinic operating details as a public healthcare provider with paid services.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material contradiction to the otherwise credible healthcare presentation and drives the elevated risk posture for sensitive interactions. External reputation data also records one malicious and two suspicious detections, although the site content itself shows no login form, hidden sensitive form, wallet functionality, or detected brand-impersonation pattern. The available pages consistently describe a dental clinic rather than a financial or credential-harvesting operation, but that benign presentation does not resolve the confirmed blacklist finding. No separate identity contradiction or explicit phishing pattern was observed in the supplied page evidence.

EVIDENCE

- The homepage presents a detailed dental-clinic profile, including therapy, surgery, prosthetics, orthodontics, radiology, prices, opening hours, and patient instructions.
- The site's technical history records registration on 2016-05-02, making the domain approximately 10.3 years old.
- Historical records show 88 archive snapshots from 2016-09-25 through 2026-08-02, covering 11 tracked years.
- External reputation evidence records a confirmed blacklist hit, alongside 1 malicious and 2 suspicious detections.

Regulatory Verification Notes

The site contains substantial institutional material, including administration, service descriptions, prices, patient information, personal-data protection, complaints procedures, higher-organization references, and contact details. Its presentation is consistent with a public dental polyclinic, but the real-world operator remains independently unverified by the supplied evidence. The reviewed pages do not present a license or registration number, so healthcare authorization and institutional status cannot be independently confirmed from the site. The registration record names Reliable Software, Ltd as registrar and associates the domain with the 11th City Clinical Dental Polyclinic in Minsk; this is a useful consistency signal, not proof of current legal control. The confirmed blacklist signal remains a reputational warning rather than a regulatory finding.

EVIDENCE

- The administration, "About," patient-information, personal-data, complaints, and higher-organization pages provide institutional and governance-related content.
- The registration record lists Reliable Software, Ltd as registrar and the creation date as 2016-05-02.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-10-03.
- No license or registration number is presented in the reviewed legal and institutional content.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm that the domain is published by the relevant Minsk healthcare authority and that the clinic's listed telephone numbers and address match an offline or independently sourced directory. Any healthcare authorization or registration should be checked directly with the applicable Belarusian registry or supervising authority. Appointment or consultation requests should be limited to information necessary for scheduling until those checks are complete.

EVIDENCE

- The contact page lists the Minsk address, weekday and Saturday operating hours, registration telephone number, and hotline.
- The appointment-request functionality is identified as a contact or booking form rather than a login or password-collection form.
- The site provides separate sections for prices, payment methods, patient guidance, and institutional contacts that can be cross-checked independently.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a coherent, information-rich healthcare presentation and a long-running public-facing footprint, but the confirmed blacklist contradiction and lack of independently verified operator identity prevent a dependable legitimacy conclusion.

Infrastructure Integrity

The site is hosted directly through BCTBY-AS—Belarusian Cloud Technologies LLC in Belarus, without a detected CDN or WAF; two likely origin addresses were identified. This provides less protective separation between the service and its hosting environment, and the infrastructure should be treated as a mitigating or neutral technical fact rather than evidence of legitimacy.

EVIDENCE

- Hosted on AS60330, BCTBY-AS—Belarusian Cloud Technologies LLC, BY.
- Infrastructure analysis identified 2 unique IP addresses, 0 edge IP addresses, and 2 likely origin IP addresses.
- The site uses a DV TLS certificate issued by YR2, valid to 2026-10-03.

Closing Assessment

Until independent institutional and regulatory confirmation is obtained, the appropriate posture is limited informational use only, with no submission of credentials, identity data, or payment information.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 11stom.by.

- The request stayed on 11stom.by. It was not redirected to another domain. CLEAR
- Registration is published under Reliable Software, Ltd. CLEAR
- DNS for this domain is served by g-cloud.by, across 2 name servers. NOTED
- The registration is paid up to 2027-05-02. NOTED
- The earliest public archive of this site is from 2016-09-25. CLEAR
- It is hosted on BCTBY-AS, from a server in BY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 11stom.by at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
