

Is 123-quit-smoking.com a scam? TrustSniffer's high-risk assessment: 0/100

123-quit-smoking.com

Verdict

0

OUT OF 100

CRITICAL RISK

123-quit-smoking.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A minimal 'Coming Soon' WordPress placeholder page with no links, forms, or monetization. Low risk and limited content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://123-quit-smoking.com/>

What 123-quit-smoking.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal WordPress “Coming Soon” placeholder for 123-quit-smoking.com, presenting only a notice that a new website is being built and offering no visible product, service, transaction, or account workflow.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence has classified the domain as malicious and blacklisted it, including detections associated with Kaspersky and Sophos. This finding materially outweighs the benign appearance of the current placeholder page: no login form, payment flow, wallet function, or active service is exposed, but the absence of an active interaction surface does not neutralize the domain-level reputation signal. No on-page brand impersonation or phishing form was observed, and the historical record shows sustained archival presence rather than an obviously short-lived domain; these are contextual positives, not a basis for overriding the confirmed external contradiction.

EVIDENCE

- External security telemetry recorded 13 malicious and 1 suspicious detection out of 19 effective detections, with Kaspersky and Sophos among the flagged vendors.
- The domain is recorded as blacklisted by two external sources; the site's homepage itself contains no active login or sensitive-input form.
- Domain registration: 2012 (~14.5 years old), through Squarespace Domains II LLC.
- Web archives contain 101 snapshots spanning 2001–2026, with 26 years tracked.

Regulatory Verification Notes

The available site content does not identify an operating entity, licensing authority, registration number, or regulated service. This is a material disclosure gap for any future health, commercial, or advisory service associated with the domain, although the placeholder page does not currently make a regulated-service claim. Identity verification remains unconfirmed; therefore, the site's apparent purpose cannot be connected independently to a real-world operator. The absence of a broker-dataset match provides no licensing or regulatory conclusion.

EVIDENCE

- The homepage contains only “Coming Soon” text and does not provide legal, operator, or licensing disclosures.
- The site is served from AS47583, AS-HOSTINGER — Hostinger International Limited, CY, with the resolved infrastructure located in Ukraine.
- TLS uses issuer WR1 with Domain Validation (DV), valid to 2026-09-21 22:08:17 UTC.

What to Verify Next

Any future engagement should remain limited to passive review until the operator publishes verifiable legal and contact information. Before credentials, payments, downloads, or other sensitive actions are considered, an applicable licensing registry should be checked independently against the named legal entity and the official contact channels should be confirmed through an offline or independently sourced route.

EVIDENCE

- The homepage provides no legal or licensing material against which an operator or authorization can currently be checked.
- The current page exposes no forms, links, account functions, or transaction mechanism, so there is no on-site basis for validating a future service workflow.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The domain's established technical and archival characteristics do not overcome the confirmed external reputation contradiction, while the real-world operator remains unverified.

Infrastructure Integrity

The site is not behind a detected CDN, and four resolved addresses are assessed as likely origin addresses. Hosting is provided through AS47583, Hostinger International Limited, and the infrastructure record includes no detected CDN or WAF vendor; this offers limited mitigation and should not be treated as evidence of legitimacy.

Closing Assessment

Passive observation is the proportionate use case at present; credentials, financial information, downloads, and other sensitive interactions should not be undertaken unless the external reputation issue is independently resolved and the operator is verifiably established.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 123-quit-smoking.com.

- The request stayed on 123-quit-smoking.com. It was not redirected to another domain. CLEAR

- Registration is published under Squarespace Domains II LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-18. NOTED
- The earliest public archive of this site is from 2001-02-03. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 123-quit-smoking.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
