

# Is 13048.cc a scam? TrustSniffer's high-risk assessment: 0/100

13048.cc

## Verdict

0

OUT OF 100

CRITICAL RISK

13048.cc shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Minimal parked-domain page indicating the domain 13048.cc is expired/for sale with links to terms/privacy and a registrar auction notice. No service, forms, or active product present.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

What 13048.cc served when TrustSniffer captured it on 2026-08-18. The page may look different now.

## Key findings

---

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

---

### Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal parked-domain landing page for 13048.cc. It tells visitors that the domain may be for sale, provides links to terms and privacy pages, and displays a Dynadot auction notice; it does not present an active product, service, account function, or operating business model.

### Scam/Impersonation Risk

The principal risk is external rather than a demonstrated malicious workflow on the current page. The domain is blacklisted by the listed external sources, with multiple security vendors reporting malicious detections. This is a material contradiction that supports a clearly cautionary posture, even though the page itself contains no login form, sensitive form, wallet connection, cloaking behavior, or active service. No distinct legal-entity conflict or on-page brand impersonation was observed.

#### EVIDENCE

- External reputation evaluation recorded 16 malicious detections, 1 suspicious detection, and 3 Tier-1 vendors identifying a threat: Fortinet, Kaspersky, and Sophos.
- The domain was identified as blacklisted by VT and EXTERNAL\_BLACKLIST; Google Safe Browsing recorded no malicious result.
- Registry records show creation on 2025-08-10, a listed age of 1.02 years, and a reconciled historical age of 2.242299794661191 years.
- Archive records contain 3 snapshots spanning 2024–2026, covering 3 tracked years.

#### Regulatory Verification Notes

The page is not an operating financial, trading, or commercial service and makes no licensing or registration claim. Its terms and privacy links do not establish a responsible operating entity, and the available evidence does not independently verify the identity of an operator. The absence of an active service limits the immediate regulatory assessment, but any future use of the domain for financial, commercial, or account-based activity would require a fresh legal-entity and licensing review. No matching broker signal was identified in the available third-party context.

#### EVIDENCE

- The homepage describes the domain as expired and potentially available through Dynadot auctions rather than identifying a service provider.
- The site is hosted on AS133618, TRELLIAN-AS-AP — Trellian Pty. Limited, AU.
- The site uses a DV TLS certificate issued by YR1, valid to 2026-11-08T18:44:11+00:00.
- The available broker-reputation context contains no match.

#### What to Verify Next

The domain's current status should be confirmed directly through Dynadot's official auction and registrar channels, using an independently sourced contact route rather than relying solely on page links. If the domain later presents an operating service, the proposed legal entity, applicable regulator, licensing number, terms, payment arrangements, and independent contact channels should be validated before any sensitive interaction. Any material change from the current parked page should be treated as a new assessment trigger.

#### EVIDENCE

- The current homepage has 0 forms and no sensitive-form or login functionality.
- Browser testing recorded 2 successful runs, with 0 external XHR/fetch requests and 0 wallet-connection runs.
- The domain has no detected active product or service on the captured page.

#### Summary Verdict

The overall posture is **critical trust risk**. The domain should not be treated as an established operating service, and the external security detections and blacklist status outweigh the benign, inactive appearance of the landing page.

## Infrastructure Integrity

The domain resolves through direct hosting infrastructure with no detected CDN or WAF layer; the resolved addresses were assessed as likely origin addresses. This provides little protective mitigation for the wider reputation concern, although the site's transport encryption is currently functioning.

## Closing Assessment

Credentials, payment details, downloads, and other sensitive interactions should not be performed through this domain unless an independent security review first establishes that its status and purpose have materially changed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

**Governance Risk**
  - The registration record withholds contact details for the operator.

Registration and ownership rule:KF\_WHOIS\_HIDDEN
  - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF\_WHOIS\_PRIVATE
- 02

**Sensitive Interaction Risk**
  - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct\_threat
  - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT\_BLACKLIST\_CRITICAL

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of 13048.cc.

- The request stayed on 13048.cc. It was not redirected to another domain. 

CLEAR

- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by abovedomains.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-10. NOTED
- The earliest public archive of this site is from 2024-05-20. CLEAR
- It is hosted on TRELLIAN-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 13048.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
