Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Chinese-language promotional landing page for the K8 online gambling and betting service. It presents live-casino and wagering access through multiple entry links, promotes regulatory and sponsorship claims, and appears designed to direct visitors toward deposits and betting activity.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Multiple external security detections identify the domain as malicious or suspicious, and the domain is blacklisted across external sources. The homepage also exhibits a high-risk deposit-before-service model: it promotes live games and betting lines while providing little operational detail, creating an opaque path from visitor access to financial activity. No confirmed brand impersonation or conflicting legal-entity identity was established, but the external threat findings are sufficient to make account access, credential submission, deposits, and wagering inappropriate. The site's historical record does not resolve these current security concerns.

EVIDENCE

- The homepage is a 154-character betting landing page titled “K8官网 - 天生赢家·一触即发” and provides three numbered entry links to betting lines.
- External security evaluation recorded 15 malicious detections and 1 suspicious detection; three named security providers also flagged the domain.
- The domain is recorded as blacklisted by two external sources.
- The registration record shows creation on 2025-06-05, with a recorded WHOIS age of 1.2 years.

Regulatory Verification Notes

The homepage claims compliance with the Macau DICJ licensing and supervisory framework, a 20-year brand history, and an official Asia partnership with Atlético Madrid. Those claims are not substantiated on the available page by a license number, verifiable operator identity, detailed terms, or a clear contact address. The page therefore does not provide a sufficient basis to treat the claimed regulatory status or affiliations as established. The available identity verification remains unverified; the registrar record identifies Spaceship, Inc., while the registrant is represented through a privacy service. This is an identity-verification limitation rather than an independent finding of fraud. The absence of a matching record in the broker-reputation dataset provides no additional corroboration, but it is not a licensing determination.

EVIDENCE

- The homepage states that the service is licensed and supervised by DICJ but supplies no license number or supporting licensing document.
- The homepage claims “20年品牌 信誉保障” and an Atlético Madrid Asia partnership without presenting supporting evidence.
- The page contains no detailed product or betting terms and no verifiable contact or address information.
- The domain is registered through Spaceship, Inc.; the stated expiration date is 2027-06-05T07:31:05Z.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the claimed operator and authorization directly through the relevant Macau regulatory registry, using details obtained outside the website. The claimed sports affiliation should likewise be confirmed through an independently accessed Atlético Madrid corporate or partnership channel. Payment protection, withdrawal conditions, dispute handling, and the legal entity receiving funds should be established before any financial commitment. Until those checks are completed, the site should not be used for authentication, credential submission, deposits, or wagering.

EVIDENCE

- The homepage returned HTTP status 200 but contained no login or sensitive-data form.
- Behavioral testing completed 2 runs successfully; it observed 2 external XHR requests and 2 external POST requests, all classified as non-whitelisted.
- No wallet-connection flow, wallet provider, hidden form, or password-external form was detected during the observed interaction.

Summary Verdict

The overall posture is critical, with the available evidence failing to support legitimate or safe sensitive engagement. The site's identity is not independently verified, and the observed contradictions outweigh its limited positive technical characteristics. It should be treated as unsuitable for credential or financial interaction.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF infrastructure, with observed edge and potential origin-candidate addresses. This provides a mitigating layer against direct infrastructure exposure but does not validate the operator, the site's regulatory claims, or its reputation.

Closing Assessment

Maintain a non-interactive posture unless the operator, authorization, affiliation, and payment arrangements are independently verified through trusted channels.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 135538.vip at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
