

Is 139kk.shop a scam? TrustSniffer's high-risk assessment: 0/100

139kk.shop

Verdict

0

OUT OF 100

CRITICAL RISK

139kk.shop shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Short Chinese-language casino landing page advertising large newcomer and first-deposit bonuses and offering domestic/overseas/VPN routes to access the service; minimal disclosure or contact/legal information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 139kk.shop served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a short Chinese-language promotional casino landing page for PG-branded gambling offers, presenting newcomer and first-deposit bonuses and directing visitors toward domestic, overseas, and VPN access routes intended to drive registration and deposits.

Scam/Impersonation Risk

The site presents a **high-risk interaction profile**. Its homepage promotes a newcomer "16888" bonus and a 100% first-deposit bonus, while directing visitors to access routes described as domestic, overseas, or VPN links. The page provides little product, operator, contact, or legal information and encourages deposit activity before any substantive service description. These conversion tactics are reinforced by confirmed blacklisting across multiple external security sources, including malicious detections from major security providers. No conflicting legal-entity names or explicit brand-impersonation finding was identified, but the confirmed blacklist status and the page's deposit-driven design establish a materially elevated risk for account, payment, and other sensitive interactions.

EVIDENCE

- Homepage: Chinese-language casino landing page advertising a “16888” newcomer bonus and a 100% first-deposit bonus.
- Homepage: Domestic, overseas, and VPN access routes are provided, including links described as intended to prevent blocking.
- External security telemetry: 18 malicious detections were recorded from 23 evaluated results; Fortinet and Sophos were among the flagged providers, and blacklist status was confirmed by VT and an external blacklist.
- Homepage: The page contains approximately 239 characters of promotional text, with no substantive product explanation, visible login form, or sensitive form.

Regulatory Verification Notes

The available page content does not establish the legal identity of the operator, the governing entity, or any gambling licence or registration number. This is a significant disclosure gap for a service soliciting deposits, rather than independent proof of fraud by itself. The site’s apparent gambling model and access-routing language make jurisdiction, licensing, age controls, responsible-gambling information, and payment-fund protections particularly important to verify independently. The domain’s identity remains unverified, and the available authority signal is low; the absence of a matching broker record is only contextual and is not a licensing determination.

EVIDENCE

- Domain registration continuity: Registered 2022 (approximately 3.07 years old).
- Web archive: 2 snapshots spanning 2023–2023, with 1 year tracked.
- Hosting telemetry: Served from AS13335, Cloudflare, Inc., United States.
- Transport encryption: TLS certificate issued by WE1 using DV validation, valid to 2026-11-02.

What to Verify Next

An institution should first identify the operating legal entity and confirm its gambling authorisation directly with the relevant jurisdictional regulator, using the regulator’s own registry rather than links supplied by the site. Payment arrangements, withdrawal conditions, bonus restrictions, age controls, dispute procedures, and responsible-gambling provisions should be obtained in complete written form before any transaction. Official support and contact channels should be confirmed through an independent, offline route, and any access or registration destination should be checked against the regulator-confirmed operator identity.

EVIDENCE

- Homepage: No clear operator, licence, registration, or legal-disclosure information is presented in the captured content.
- Homepage: The principal calls to action direct visitors toward registration and deposit-related promotions.
- Site content: The stated business model is a promotional casino landing page rather than a clearly documented service platform.

Summary Verdict

The website has a **critical trust posture** and should be treated as unsuitable for sensitive interaction. The convergence of confirmed external security contradictions, thin promotional content, unverified identity, and deposit-oriented conversion design outweighs the limited positive technical indicators. The site should not be regarded as an established or independently validated gambling operator.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were Cloudflare edge infrastructure rather than an exposed origin. This provides a mitigating layer against direct origin exposure but does not validate the operator, content, payment flow, or security reputation; edge-only visibility can also permit rapid content changes behind the protective service.

Closing Assessment

Prospective users and institutions should suspend account creation, credential submission, and financial transactions until the operator, licence, payment protections, and official contact channels have been independently authenticated.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 139kk.shop.

- The request stayed on 139kk.shop. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2023-07-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 139kk.shop at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
