

Is 13canalger2018.com a scam? TrustSniffer's high-risk assessment: 0/100

13canalger2018.com

Verdict

0

OUT OF 100

CRITICAL RISK

13canalger2018.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A migration announcement informing users that Comick.io moved to Comickkk.com, assuring data migration and improved performance; includes a short list of other manga sites and quick links (privacy, terms, contact). No forms or financial solicitations present in the provided content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://13canalger2018.com/

What 13canalger2018.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a migration announcement for a manga, manhwa, and webtoon distribution platform. It presents itself as the former Comick.io service moving to Comickkk.com, assures visitors that user libraries and reading history were migrated, and directs existing users to continue through the new domain.

Scam/Impersonation Risk

The central risk is not the page's apparent content model, which is informational and contains no financial solicitation or captured login form, but the contradiction between that benign presentation and strong external threat intelligence. The domain has confirmed blacklist detections, including malicious classifications from multiple security providers. The migration notice also instructs users to visit the replacement domain and log in, creating a sensitive-account transition scenario that warrants security-forward treatment. No conflicting legal-entity names or page-level brand-impersonation finding were identified; the adverse conclusion is driven by the external threat detections and blacklist status.

EVIDENCE

- The homepage is titled “Comick Migration - Read Manga at Comickkk.com” and directs Comick.io users to the replacement domain while stating that account data, reading history, and saved titles were migrated.
- External reputation assessment recorded 15 malicious detections and 1 suspicious detection, with Kaspersky and Sophos among the flagged security providers; the domain was also identified by external blacklist sources.
- Domain registration record: 2025-09-19, approximately 0.91 years old; registrar: Wild West Domains, LLC.
- Web-archive coverage: 39 snapshots spanning 2018-09-06 through 2025-06-24, covering 8 tracked years.

Regulatory Verification Notes

The site presents privacy, terms, and contact links, but the supplied material does not establish a verified real-world operator or a clear corporate disclosure. No license claim, registration number, or regulatory authority is presented. That is a transparency and verification gap rather than independent proof of a scam; however, combined with the external reputation findings, it prevents reliance on the site’s own migration assurances. The long archival record is useful provenance context, but it does not authenticate the current operator or authorize the account transition.

EVIDENCE

- The homepage identifies the service as a manga, manhwa, and webtoon platform and provides links to privacy, terms, and contact pages.
- No license authority or license number is claimed in the analyzed business and legal content.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS is DV, issued by WE1, valid to 2026-10-10T04:20:58+00:00.

What to Verify Next

Independent confirmation should be obtained from an established Comick communication channel that the migration to the replacement domain is genuine and that existing accounts are intended to be used there. The operator’s legal identity, ownership, and any applicable authorization should be confirmed through independently sourced records rather than relying solely on the site’s privacy, terms, or migration statements. Until those checks succeed, account credentials, reused passwords, payment details, and other sensitive information should not be submitted.

EVIDENCE

- Confirm the migration announcement through a previously trusted, independently obtained Comick communication route rather than through the analyzed page alone.
- Review the terms, privacy, and contact pages for a named legal entity, governing jurisdiction, and accountable contact details.
- Validate any claimed service authorization or rights with the relevant independent registry or rights holder before account activation or paid use.
- Confirm official support channels through an offline or previously trusted route before responding to account-recovery or migration requests.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site may present a legitimate-looking informational migration service, but its identity remains unverified and the external contradiction is sufficiently serious that the site's assurances should not be treated as reliable.

Infrastructure Integrity

Cloudflare CDN/WAF protection is a mitigating infrastructure characteristic, not proof of legitimacy. All observed addresses were Cloudflare edge infrastructure, and the origin server was not observable in this analysis; this limits independent assessment of the underlying host and allows the protected service layer to change without exposing the origin.

EVIDENCE

- Observed edge infrastructure: 104.21.52.243, 172.67.205.212, 2606:4700:3034::ac43:cdd4, and 2606:4700:3037::6815:34f3, all associated with AS13335.
- Hosting provider: CLOUDFLARENET - Cloudflare, Inc., US; CDN/WAF detected with 4 edge IPs and 0 origin candidates.
- Origin visibility: no origin server IP was observable in the analysis.

Closing Assessment

The appropriate operational posture is to limit activity to non-sensitive viewing while independent confirmation is obtained, and to escalate any request for credentials, account migration, payment, or recovery information for separate security review.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 13canalger2018.com.

- The request stayed on 13canalger2018.com. It was not redirected to another domain. CLEAR
- Registration is published under Wild West Domains, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-19. NOTED
- The earliest public archive of this site is from 2018-09-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 13canalger2018.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
