What 1405comunicaciones.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

1405comunicaciones.com is an informational corporate website for an audiovisual production company identified as 1405 Comunicaciones, presenting film, television, advertising, documentary, corporate, casting, photography, post-production, location-scouting, and equipment-rental services for clients in Lima, Peru.

Scam/Impersonation Risk

The website's visible content is consistent with a small audiovisual-services business and does not present a login form, credential-harvesting workflow, cryptocurrency feature, or other sensitive interaction mechanism. However, this benign page presentation is outweighed by a confirmed external blacklist signal: ten malicious detections and one suspicious detection were recorded, including a Tier-1 threat detection. The available evidence does not show conflicting legal-entity names, brand impersonation, or phishing behavior on the pages reviewed, but the blacklist and malicious-detection results constitute a material contradiction requiring a security-forward posture.

EVIDENCE

- The homepage describes audiovisual production, casting, post-production, photography, location scouting, and equipment rental rather than financial or credential-based services.
- External reputation checks recorded 10 malicious detections and 1 suspicious detection, with Sophos among the flagged vendors and the domain present on an external blacklist.
- Domain registration telemetry records creation on 2012-10-18 and an age of 13.84 years.
- Archive telemetry records 25 snapshots from 2018-08-05 through 2026-05-13, spanning 9 tracked years.

Regulatory Verification Notes

The About content states that the company is located in Lima, Peru, began in 2004, and serves film, television, radio, advertising, documentary, and corporate projects. Those on-site claims provide business context but do not independently verify the real-world operator; identity verification remains unverified. The site does not claim a regulatory license or publish a license number, so the applicable Peruvian corporate and commercial standing should be confirmed independently rather than inferred from the site's presentation. The available broker-reputation dataset contained no matched record, but that is contextual only and is not a licensing or regulatory determination.

EVIDENCE

- The About page states that the company is based in Lima, Peru, and was established in 2004.
- The site's services and company-information pages contain no stated license authority or license number.
- Hosting telemetry records AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-18T19:38:12+00:00.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm the company's legal registration and the identity of the contracting entity through the relevant Peruvian registry or an established offline business channel. Contracting parties should also validate the official contact routes through an independently sourced telephone number, business record, or known client relationship, and require normal contractual documentation before transferring funds or sharing confidential production materials.

EVIDENCE

- The About and company-information pages provide the stated business history and location that should be matched against an independent corporate record.
- The Contact page is the site-designated channel for engagement and should be corroborated through an independent source before use.
- The site has no login form or sensitive web form in the reviewed page behavior, so any request for credentials or payment should be treated as a separate, externally initiated interaction requiring validation.

Summary Verdict

The overall posture is critical, with the site unsuitable for credentials, financial activity, or other sensitive interaction. Although the displayed business model is coherent and non-financial, the confirmed external reputation contradiction prevents the website from being treated as trustworthy for enterprise engagement.

Infrastructure Integrity

Cloudflare CDN and WAF protection are present, and all observed addresses are Cloudflare edge infrastructure rather than an exposed origin address. This reduces direct origin exposure but is only a mitigating technical control; it does not resolve the external reputation findings.

EVIDENCE

- Infrastructure telemetry identifies four observed Cloudflare edge addresses, all associated with AS13335, with zero likely origin candidates.
- The hosting provider is CLOUDFLARENET — Cloudflare, Inc., US, and the registry is ARIN.

Closing Assessment

Sensitive use should be withheld pending independent validation of the counterparty and resolution of the external security warnings; read-only inspection is the proportionate interim posture.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1405comunicaciones.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
