

Is 15005.vip a scam? TrustSniffer's high-risk assessment: 0/100

15005.vip

Verdict

0

OUT OF 100

CRITICAL RISK

15005.vip shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Very short page showing a security label and an immediate redirect to 15005.vip. No contextual information, contact, or provenance. Acts as a traffic-forwarding landing page and should be treated as suspicious.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	20 flagged it VirusTotal	RISK

The page as captured

<https://15005.vip/>

What 15005.vip served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a single-purpose security-labelled landing page that immediately redirects visitors to the external domain 15005.vip. It presents no identifiable product, service, commercial purpose, or operator context, and its apparent function is traffic forwarding rather than a transparent business interaction.

Scam/Impersonation Risk

The site presents a **critical interaction risk**. Independent threat-intelligence evidence records a confirmed blacklist status supported by multiple sources, including substantial malicious detections, which is a direct contradiction to treating the domain as a normal trusted service. The homepage's automatic external redirect, minimal "Security" message, absence of provenance, and two suspicious inline scripts are consistent with a redirector or staging mechanism; they do not by themselves establish the operator's identity or prove brand impersonation, but they materially reinforce the external threat findings. No sensitive form, wallet connection, credential collection, or confirmed brand impersonation was observed during the available interaction analysis.

EVIDENCE

- Homepage: displays only “Security” and automatically forwards visitors to 15005.vip.
- Homepage behavior: automatic external-domain forwarding and two suspicious inline scripts were observed.
- External reputation: confirmed blacklist status with 20 malicious detections in the evaluated results; Fortinet, Kaspersky, and Sophos were among the flagged vendors.
- Domain provenance: registered 2022-03-14 and currently approximately 4.43 years old; the archive contains 7 snapshots spanning 2024–2026 across 3 years.

Regulatory Verification Notes

The available site content does not disclose a legal entity, licensing authority, registration number, or regulated-service status. This is a material verification gap for any financial or other high-stakes use, while the independently verified operator identity remains unconfirmed. The domain is registered through Dynadot Inc, and its transport encryption is valid, but those administrative and technical facts do not validate the underlying business or operator.

EVIDENCE

- Registration record: registered 2022-03-14; registrar listed as Dynadot Inc.
- Hosting infrastructure: served from AS35251, ANTI-DDOS - NetLab Global, US.
- Transport encryption: TLS certificate issued by YE1, DV validation, valid to 2026-09-30.
- Legal and regulatory pages: no company name, licensing authority, or license number is presented on the available site content.

What to Verify Next

Any proposed business relationship should first be validated through an independently sourced official registry and a separately obtained contact route, rather than through the landing page or its redirect destination. Security personnel should also resolve the redirect only in an isolated analysis environment, confirm the final domain’s ownership and purpose independently, and retain blocking or monitoring controls until those checks are complete.

EVIDENCE

- Homepage: provides no independent operator, product, pricing, or contact context from which a business relationship can be validated.
- Redirect behavior: forwards visitors to a separate domain, requiring independent confirmation of the destination before access.
- Regulatory verification: no licensing or registration reference is available on the site to reconcile against an official registry.

Summary Verdict

The overall posture is critically untrusted, with the available evidence supporting a sensitive-interaction risk classification rather than ordinary website engagement. The site’s limited identity and business context,

combined with convergent external threat findings, do not support treating it as a legitimate service for operational use.

Infrastructure Integrity

A CDN/WAF layer is present, with an observed edge server at 104.208.110.252 on AS8075 and two potential origin candidates identified. This protective layer may reduce direct infrastructure exposure, but it is only a mitigating technical control and does not offset the site’s reputation and content risks.

Closing Assessment

The appropriate disposition is to block or isolate the domain for investigative purposes and avoid login, credential submission, or financial interaction unless independent validation produces a compelling and documented basis for engagement.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 15005.vip.

- The request stayed on 15005.vip. It was not redirected to another domain. CLEAR
- Registration is published under Dynadot Inc. CLEAR
- DNS for this domain is served by xundns.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-14. CLEAR
- The earliest public archive of this site is from 2024-06-15. CLEAR
- It is hosted on ANTI-DDOS, from a server in HK. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 15005.vip at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
