

Is 151.rs a scam? TrustSniffer's high-risk assessment: 0/100

151.rs

Verdict

0

OUT OF 100

CRITICAL RISK

151.rs shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A WordPress "Nothing Found" / search page for a small informational blog. No sign-in, payments, or financial claims. Minimal content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	11 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	2 months old Most scam domains are under a year old	RISK

Certificate	Encrypted connection Issued by WE1	NOTED

The page as captured

https://151.rs/

What 151.rs served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

151.rs presents as a minimal WordPress informational blog. The available page is an empty “Nothing Found” search view with basic navigation, a search function, and no visible sign-in, payment, or financial-service functionality; its apparent purpose is the publication of general content, although the captured page contains very little substantive material.

Scam/Impersonation Risk

The site’s visible content does not itself show a login workflow, payment request, financial solicitation, brand impersonation, or identity inconsistency. However, this benign presentation is materially outweighed by confirmed external reputation contradictions: the domain is blacklisted, and multiple external detections classify it as malicious or suspicious, including a Tier-1 detection from Sophos. The absence of malicious behavior during the limited page interaction does not invalidate those findings; it only indicates that the captured page did not expose an active payload or sensitive workflow. The overall posture is therefore clearly unsuitable for credentials, downloads, financial activity, or other sensitive interaction.

EVIDENCE

- External reputation results recorded 11 malicious and 2 suspicious detections from 18 evaluated results; Sophos was among the flagged vendors.
- The domain was identified as blacklisted by both VT and an external blacklist source; Google Safe Browsing returned no malicious result.
- Archive records show 53 snapshots spanning 2021-11-23 through 2026-05-20, with 6 years tracked; the historical record does not establish a verified current operator identity.

Regulatory Verification Notes

The available page is an informational WordPress view rather than a substantive corporate, legal, or regulated-service presentation. It provides no visible license claim, registration number, or clear operator disclosure in the captured content, so the real-world identity remains unverified. This is a verification gap rather than, by itself, proof of fraud; the principal risk conclusion instead rests on the confirmed external blacklist and malicious-detection findings. No matching broker record was identified in the available third-party context.

EVIDENCE

- WHOIS telemetry records registration on 2026-06-23, an age of 0.15 years, and expiry on 2027-06-23; the registrar is Stanco d.o.o.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid through 2026-10-22.
- The captured WordPress page has a generic "WordPress -" title, no meta description, no canonical declaration, and only 207 characters of visible text.

What to Verify Next

Before any engagement beyond passive viewing, an independent corporate-registry check should establish the operator and its authority to publish or provide any services associated with the domain. Any future licensing or regulated-business claim should be confirmed directly with the relevant regulator, using independently sourced contact details rather than details supplied solely by the site. Sensitive interaction, credential submission, file downloads, and financial activity should remain prohibited unless those checks produce clear, independently corroborated results. Official support or contact channels should also be confirmed through an offline or independently sourced route.

EVIDENCE

- The captured page contains one search form only; no sensitive form, password field, or untrusted form destination was detected.
- The page exposes two internal links and no external links, leaving no independently presented corporate or regulatory reference point.
- Two behavioral runs completed successfully with zero external XHR or POST activity, zero wallet-connect runs, and no hidden forms.

Summary Verdict

151.rs should be treated as a **critical trust risk** for any sensitive interaction. The site’s apparent simplicity does not provide sufficient assurance to overcome the confirmed reputation contradictions, and its operator identity cannot be treated as independently verified.

Infrastructure Integrity

The website is fronted by Cloudflare’s CDN/WAF infrastructure, with observed hosting on AS13335 operated by Cloudflare, Inc. All observed addresses were CDN edge addresses and no origin server address was identified. This infrastructure provides a mitigating layer against direct origin exposure, but it is not evidence that the website or its operator is legitimate.

Closing Assessment

Restrict activity to passive observation while preserving relevant browser, endpoint, and network telemetry; do not authenticate, submit credentials, download content, or conduct financial activity through the site.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 151.rs.

- The request stayed on 151.rs. It was not redirected to another domain. CLEAR
- Registration is published under Stanco d.o.o.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-23. NOTED
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 151.rs at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
