Full analysis

Overview

The website at 15thjdcbreaux.com presents an official-looking online education portal associated on-page with Judge Michelle Breau. It offers court-related educational courses that require user login, course completion, a final examination, and payment before a completion certificate is issued, while identifying Justice Learning Solutions as the platform provider.

Scam/Impersonation Risk

Contradictory external reputation evidence creates a serious risk for sensitive interaction despite the website's coherent presentation and the absence of obvious page-level phishing, malware, or high-pressure solicitation indicators. The homepage presents a judge-associated identity and a normal-looking education workflow, but that on-site presentation does not independently establish the operator's real-world identity. The domain has been recorded as **blacklisted**, with multiple external malicious detections, making login, credential submission,

and payment materially inappropriate until the site's authenticity is independently confirmed. No direct brand-impersonation finding was recorded, but the external reputation contradiction remains decisive.

EVIDENCE

- The homepage is titled "Judge Michelle Breaux – Online Education," displays a message attributed to the judge, and provides a login form.
- The homepage's "How It Works" flow requires login, course completion, a final exam, and payment before certificate issuance.
- External reputation assessment recorded 6 malicious detections and 1 suspicious detection; blacklist status was also recorded.
- Domain registration: 2018-12-05 (~7.7 years old); archive coverage contains 14 snapshots spanning 2021–2026 (6 years tracked).

Regulatory Verification Notes

The site presents itself as connected to a district judge's office and describes an educational service operated through Justice Learning Solutions, but the supplied evidence does not independently verify that relationship or identify a verified regulatory authority. No license or registration number is claimed in the available business-model evidence. This is a transparency and verification gap rather than a standalone finding of fraud; however, in combination with the external blacklist and malicious detections, it substantially increases the need for independent confirmation before any sensitive interaction. The available navigation includes Privacy Policy and Disclaimer pages, but their substantive legal disclosures are not established by the supplied evidence.

EVIDENCE

- The homepage identifies Judge Michelle Breaux and references Justice Learning Solutions as the platform provider.
- No license authority or license number is claimed in the site's available business-model disclosures.
- Hosted on AS54641, IMH-IAD – InMotion Hosting, Inc., US.
- TLS certificate issued by Sectigo Public Server Authentication CA DV R36, validation level DV, valid to 2026-10-07.

What to Verify Next

An independent offline channel associated with the relevant court or judge's office should confirm that this domain is authorized to provide the described courses and collect fees. The operator's legal identity, platform-provider relationship, certificate-issuance process, and applicable licensing or registration status should be confirmed against authoritative records before account creation or payment. Any login or payment request should be reached only through the independently confirmed official channel, not through an unverified referral.

EVIDENCE

- The homepage provides “Support” and “Contact Us” navigation that can be compared with independently sourced official contact information.
- The site exposes separate Privacy Policy and Disclaimer links for review of contractual and legal disclosures.
- The portal contains one sensitive login form and supports a payment-linked course-completion workflow.

Summary Verdict

The site has a **critical trust posture** for sensitive interaction. Its official-looking educational content and technically valid transport encryption do not overcome the confirmed external reputation contradictions, and the real-world operator identity remains unverified.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by InMotion Hosting, with no detected CDN or WAF edge layer. This provides a straightforward hosting path but offers no protective CDN separation or origin shielding; infrastructure observations do not establish legitimacy and cannot offset the external reputation findings.

Closing Assessment

Sensitive use should be deferred unless the domain and payment process are confirmed through an independent, authoritative offline channel; absent that confirmation, interaction should remain limited to non-sensitive observation.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 15thjdcbreaux.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
