

Is 1773657.com a scam? TrustSniffer's high-risk assessment: 0/100

1773657.com

Verdict

0

OUT OF 100

CRITICAL RISK

1773657.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Captured page is a simple 404 Not Found response served by nginx with a short Chinese tagline. No interactive elements or monetization present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

What 1773657.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at 1773657.com currently presents visitors with a minimal nginx “404 Not Found” page and a short Chinese tagline, rather than an operational service, identifiable business offering, or functioning value proposition; its apparent purpose therefore cannot be established from the captured content.

Scam/Impersonation Risk

The site presents a **critical interaction risk** because external security intelligence records the domain as malicious and blacklisted, with 13 malicious detections and threat flags from Fortinet and Sophos. These findings are materially more significant than the benign appearance of the captured page: the page is only an error response, so it provides no substantive content that could explain or rebut the external detections. No brand impersonation, phishing form, or conflicting legal-entity identity was observed in the captured page, but the absence of active content does not neutralize the confirmed reputation contradiction. The historical record also predates the current registration, so it should not be treated as proof of continuity with the present operator.

EVIDENCE

- Homepage: returns “404 Not Found” through nginx and contains only a brief Chinese tagline.
- External reputation telemetry: 13 malicious detections were recorded; Fortinet and Sophos were among the flagged vendors.
- Domain registration: registered in 2025 (~1.53 years old), with creation date 2025-02-04T03:48:41Z and expiry date 2028-02-04T03:48:41Z.
- Archive provenance: 33 snapshots spanning 2018–2026, covering 9 tracked years.

Regulatory Verification Notes

The available page does not provide a functioning legal or corporate disclosure, licensing claim, registration number, or identifiable regulated-service basis. This is a material verification gap for any site that might later solicit credentials, payments, or other sensitive activity, although the capture does not establish a specific regulatory violation. Ownership and governance remain opaque, and the real-world operator is not independently verified. The absence of a match in the available broker-reputation dataset is only contextual and does not offset the confirmed external security warnings.

EVIDENCE

- Homepage: no company identity, legal notice, licence, registration number, or operating-service disclosure is visible.
- Hosting telemetry: served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Transport security: TLS certificate issued by WE1 using DV validation, valid to 2026-10-04T18:28:43+00:00.
- Authority telemetry: page authority is recorded in the mid band, but this does not establish legal identity or regulatory status.

What to Verify Next

Before any sensitive interaction, an independent source should confirm the operator’s legal name, jurisdiction, licensing status, and official contact channels. Any future payment, account, or credential request should be checked against independently obtained business records and protected through established payment-recovery mechanisms; absent those confirmations, sensitive interaction should not proceed.

EVIDENCE

- Homepage capture: provides no operational service or identity information against which an operator can be independently matched.
- Regulatory verification target: licensing and registration claims require confirmation with the relevant jurisdictional register rather than reliance on the website.
- Contact verification target: official support channels should be confirmed through an independent, offline or previously trusted route.

Summary Verdict

The available evidence supports a critical-risk posture, with the domain’s confirmed blacklist status and malicious detections outweighing its limited benign page presentation and basic transport-security signals. The site’s current operator and business purpose remain unverified, and the available material is insufficient to support sensitive engagement.

Infrastructure Integrity

Cloudflare CDN/WAF protection and edge-hosted delivery provide some mitigation against direct exposure of the serving infrastructure, but they are not evidence of legitimacy. All observed addresses were Cloudflare edge servers, and the origin server was not observable in this analysis.

Closing Assessment

The appropriate institutional stance is to suspend login, credential, payment, and other sensitive activity unless independent operator and regulatory checks produce reliable corroboration.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status UNVERIFIED

Identity score 30/100

Identity verification confidence 50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1773657.com.

- The request stayed on 1773657.com. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-02-04. CLEAR
- The earliest public archive of this site is from 2018-06-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1773657.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
