

Is 17ty01.com a scam? TrustSniffer's high-risk assessment: 0/100

17ty01.com

Verdict

0

OUT OF 100

CRITICAL RISK

17ty01.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Short domain-parking landing that references bet365 and lists multiple non-official alternate domains and an app download; appears to be a gambling/affiliate doorway with no verifiable credentials or product details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://17ty01.com/>

What 17ty01.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a short, parked gambling-oriented landing page that presents the “bet365” name, directs visitors toward alternate betting domains, promotes an application download and customer-contact offers, and appears intended to function as an affiliate or referral doorway rather than as a transparent operating business.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Its homepage is a thin domain-parking page using the “bet365” title while directing visitors to multiple non-official alternate domains, advertising betting-related promotions and an application download without identifying a verifiable operator or explaining the underlying service. This combination creates a material brand-use and redirection concern, although the available evidence does not establish a distinct legal-entity identity contradiction or confirmed phishing form. Independent security intelligence also records the domain as blacklisted, with malicious classifications from multiple major security providers; the Google Safe Browsing result is not malicious, but that does not offset the corroborated adverse detections.

EVIDENCE

- The homepage is titled “bet365” and lists alternate gambling domains, application download messaging, promotional benefits and customer-service language.
- The homepage contains no login or password form, but its six external destinations support a redirect or affiliate-doorway interpretation.
- External reputation telemetry records 19 malicious detections, with Fortinet, Kaspersky and Sophos among the flagged vendors; the domain is also recorded by external blacklist sources.

Regulatory Verification Notes

The page does not present a clear gambling product, operating entity, license authority or license number. Its value flow is therefore opaque for a high-stakes betting service, and the visible claims are not accompanied by operator, terms or regulatory evidence. Independent identity verification remains unconfirmed. The domain’s registration privacy is an administrative limitation rather than an identity contradiction, but it provides no additional basis for connecting the landing page to the “bet365” brand. The absence of a broker-dataset match is contextual only and is not evidence of authorization.

EVIDENCE

- The homepage provides no identifiable operating company, licensing authority or license number.
- The homepage contains only approximately 206 characters of substantive text and no clear product or legal-information section.
- The domain was registered in 2022 and is registered through GoDaddy.com, LLC; the recorded registrant is “Registration Private” through Domains By Proxy, LLC.

What to Verify Next

Before any account creation, application installation, payment or wagering activity, an independent review should confirm the actual legal operator, the applicable gambling license and whether the advertised alternate domains are authorized by that operator. Application provenance should be checked through an official, independently reached distribution channel rather than through the landing page. Any support or contact channel should be confirmed through an offline or independently sourced route, and payment protections should be established before funds are transferred.

EVIDENCE

- The homepage presents alternate domains and an application download without a verifiable operator or authorization statement.
- The homepage provides promotional claims but no visible licensing or legal-verification material.
- The page’s business-model indicators identify redirect promotion, opaque value flow, no clear product and a high-stakes evidence gap.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence is materially inconsistent with a trustworthy, transparently operated gambling service, and the site should be treated as an

unverified redirection environment rather than as an established brand endpoint.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, which can mitigate direct exposure of the underlying service and provides a normal transport-delivery control; this is only a defensive infrastructure signal and does not establish legitimacy. The observed hosting telemetry is AS13335, CLOUDFLARENET—Cloudflare, Inc., US, with edge IP delivery rather than a directly identified origin.

EVIDENCE

- Hosted on AS13335 (CLOUDFLARENET—Cloudflare, Inc., US).
- The observed edge addresses are 104.21.36.133, 172.67.194.111, 2606:4700:3030::ac43:c26f and 2606:4700:3036::6815:2485.
- TLS uses issuer WE1 with DV validation and is valid to 2026-10-28T05:11:41+00:00.

Closing Assessment

Sensitive actions should not be performed through this site; any legitimate engagement should begin only after independent confirmation of the operator, authorization and application provenance through channels not controlled by the landing page.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 17ty01.com.

- The request stayed on 17ty01.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-23. NOTED
- The earliest public archive of this site is from 2023-02-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 17ty01.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
