

Is 1877gogreen.com safe? TrustSniffer's low-trust assessment: 40/100

1877gogreen.com

Verdict

40

OUT OF 100

LOW TRUST

1877gogreen.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A minimal local listings/directory site branded '877-GOGREEN' offering eco-friendly products and services with prominent phone contact and state selection. Appears to be a lead-generation or small directory site with no forms or overtly risky financial promises.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

1877gogreen.com is a minimal local listings and directory website branded "877-GOGREEN," presenting eco-friendly products and services through state selection and a prominent telephone contact. Its apparent business model is lead generation, directing visitors toward local contacts rather than providing a substantive online transaction or account platform.

Scam/Impersonation Risk

The site's visible content does not show a login form, credential-harvesting mechanism, financial promotion, or apparent brand impersonation, and no identity contradiction was observed across the supplied page signals. However, the benign presentation is outweighed by a confirmed external reputation contradiction: the domain is blacklisted by two listed reputation sources, with multiple malicious or suspicious detections recorded. This creates a high-risk basis for sensitive interaction despite the limited and apparently informational page content. Evidence:

- The homepage presents "877-GOGREEN," a state selector, and a call-oriented contact path, with no login or sensitive-input form detected.

- External reputation telemetry records 2 malicious and 1 suspicious detections, with blacklist status reported by 2 sources.
- The domain was registered on 2007-10-19 and is 18.84 years old.
- Archive records contain 48 snapshots spanning 2010–2026, covering 17 tracked years.

Regulatory Verification Notes

The website appears to operate as a local directory or lead-generation service, not as a declared financial or regulated service. Its visible navigation includes Privacy, Trademarks, and Contact pages, but the supplied content does not establish a named real-world operator, licensing authority, or registration number. Identity therefore remains unverified, and any business relationship should be assessed on the basis of independently confirmed ownership and service responsibility rather than the site's branding alone. A separate broker-reputation dataset produced no match; this is contextual only and does not establish regulatory standing.

Evidence:

- The homepage identifies the service as “Eco-Friendly Products & Services” and provides state-based local listings.
- The supplied business-model assessment records no claimed license, licensing authority, or license number.
- The site is served from AS14618, AMAZON-AES – Amazon.com, Inc., US.
- The site's TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-01T18:16:39+00:00.

What to Verify Next

Before any commercial engagement, the prospective party should independently confirm which legal entity operates the directory, establish the responsibility of any local business reached through it, and validate advertised listings through separate business records or offline contact routes. Any payment request, collection of personal information, or redirection to another service should be assessed separately and should not be accepted solely because it originates from this domain. Evidence:

- The homepage is a short, phone-led directory presentation with no online forms detected.
- The contact path is centered on the displayed telephone number and local-state selection rather than an identified corporate service desk.
- The site exposes Privacy, Trademarks, and Contact navigation, providing specific pages for independent review of operator and usage terms.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. Apparent informational content and long-running domain presence do not offset the confirmed external reputation contradiction, while the real-world operator remains unverified.

Infrastructure Integrity

AWS CDN/WAF protection is a mitigating infrastructure control, but it is not evidence of legitimacy. The observed address was an AWS edge address, and no origin candidate was identified in this analysis.

EVIDENCE

- CDN/WAF provider: AWS.
- Observed edge address: 3.217.111.79 on AS14618.
- Hosting organization: AMAZON-AES – Amazon.com, Inc., US.

Closing Assessment

Prospective users should restrict activity to passive review unless the operator, listing counterparties, and purpose of any requested transaction have been independently validated; credentials, personal data, and financial transactions should not be submitted through the site on the current evidence.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1877gogreen.com.

- The request stayed on 1877gogreen.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)

- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-10-19. CLEAR
- The earliest public archive of this site is from 2010-04-25. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1877gogreen.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
