

Is 1ams.in safe? TrustSniffer's low-trust assessment: 40/100

1ams.in

Verdict

40

OUT OF 100

LOW TRUST

1ams.in is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Online store (Aarogya Medsurge Pvt. Ltd.) selling medical supplies with product catalog, login/signup, contact phone/email, and link to https://1ams.in. Appears to be a standard e-commerce storefront.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 1ams.in served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an online storefront presenting medical supplies and consumables, including ostomy bags, wound-management products, accessories, product prices, account registration, login, order tracking, and standard e-commerce purchasing functionality. Its apparent business model is direct retail sales under the name Aarogya Medsurge Private Limited.

Scam/Impersonation Risk

The site has a clearly cautionary risk posture because external threat intelligence recorded a confirmed blacklist condition, including multiple malicious detections and an additional suspicious detection. This is materially more significant than the otherwise conventional storefront presentation. No separate identity contradiction, brand-impersonation signal, or phishing-page determination was identified in the supplied page analysis, but the confirmed blacklist status warrants treating account access, credential submission, and payment activity as sensitive interactions requiring suspension pending independent validation. The homepage also contains login, signup, and order-tracking functions, increasing the potential impact if the site or its credentials are abused.

EVIDENCE

- The homepage presents login, signup, subscription, and order-tracking forms; behavioral testing confirmed a password form but no hidden forms or wallet-drainer activity.
- External reputation evaluation recorded 2 malicious detections, 1 suspicious detection, and a confirmed blacklist condition.
- The domain was registered on 2021-11-12 and is approximately 4.76 years old.
- Historical records contain 31 snapshots from 2023-01-29 through 2025-02-27, covering 3 tracked years; no suspicious repurposing or semantic drift was identified.

Regulatory Verification Notes

The storefront identifies Aarogya Medsurge Private Limited and supplies business contact details and an address, providing a plausible commercial identity, but the real-world operator is not independently verified by the available evidence. The site presents itself as a medical-supplies retailer and does not claim a specific license or display a license number; this is a regulatory-disclosure gap requiring confirmation rather than, by itself, proof of fraud. The registration record names Aarogya Medsurge Private Limited and uses Endurance International Group India Private Limited as registrar. Transport security is present, but the certificate uses domain validation only, which confirms encrypted transport rather than legal-entity validation.

EVIDENCE

- WHOIS records identify Aarogya Medsurge Private Limited as the organization and Endurance International Group India Private Limited as registrar.
- The site is served through AS47583, identified as AS-HOSTINGER / Hostinger International Limited, CY.
- The TLS certificate is issued by YE2, uses DV validation, and is valid until 2026-10-16T08:01:42+00:00.
- The storefront's stated business model is online retail of medical supplies and consumables; no license authority or license number is claimed in the supplied analysis.

What to Verify Next

Before any sensitive interaction, an independent corporate-registry check should confirm that the stated company, address, and operating business correspond to the seller. Any medical-supply licensing, product-distribution authorization, or other applicable registration should be checked directly with the relevant authority. Payment should be limited to methods offering dispute or chargeback protection, and account credentials should not be reused from other services until the site's status is resolved. Official support and contact channels should also be confirmed through an independent route rather than relying solely on the storefront.

EVIDENCE

- The storefront displays a company identity, address, telephone contact, and email contact that can be compared against authoritative records.
- The homepage offers account login, signup, and order tracking, creating a credential and transaction-verification point before use.
- The site links externally to 1ams.in, which should be checked as part of confirming the official operating domain and contact path.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The conventional e-commerce presentation and plausible business identity do not offset the confirmed external reputation contradictions, and the available evidence does not support treating the site as suitable for normal account or payment activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed address was identified as a CDN edge address rather than a directly exposed origin. This provides a mitigating layer against direct infrastructure exposure but is not evidence that the website or operator is legitimate.

Closing Assessment

The appropriate disposition is to keep interaction read-only while the company identity, applicable authorizations, official contact channels, and payment protections are independently confirmed; login, credential submission, and purchasing should remain suspended until those checks are satisfactory.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1ams.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
