

Is 1hope.fr a scam? TrustSniffer's high-risk assessment: 0/100

1hope.fr

Verdict

0

OUT OF 100

CRITICAL RISK

1hope.fr shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Site is a Piwigo-powered photo gallery with navigation and a prominent login form; lacks business, contact, or trust signals.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://1hope.fr/>

What 1hope.fr served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

1Hope Family is a Piwigo-powered photo gallery presenting albums, calendar browsing, tags, recent and random photos, and a prominent user-login interface. Its apparent purpose is private or personal photo sharing, but the visible site provides little context about its operator or access model.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External reputation evidence records a confirmed blacklist status and multiple malicious or suspicious detections, which is a direct contradiction to treating the domain as suitable for credential use. The homepage is effectively a login-only experience with no meaningful explanation of the service, creating a high-risk context for entering usernames or passwords. No separate brand impersonation or conflicting legal-entity identity was observed, and browser testing found no hidden forms, suspicious inline scripts, external requests, or wallet-draining behavior; these benign technical observations do not offset the confirmed reputation warnings.

EVIDENCE

- The homepage displays a single login form with username, password, automatic-login, password-reset, and quick-login functions, while offering no substantive service context.
- External reputation checks recorded 4 malicious and 2 suspicious detections among evaluated results, together with confirmed blacklist status.
- The domain was registered on 2021-01-26 and is approximately 5.56 years old.
- Historical captures comprise 69 snapshots spanning 2017–2026, covering 10 tracked years.

Regulatory Verification Notes

The visible site does not identify a legal operating entity, provide business contact details, or disclose a licensing or registration basis. Because the page presents a photo gallery rather than a clearly defined regulated financial service, the absence of a license claim is primarily a transparency and verification issue; it does not independently establish fraud. The real-world operator remains unverified, and the available evidence is insufficient to connect the site confidently to a documented organization.

EVIDENCE

- The homepage identifies the service as “1Hope Family” and “Piwigo” but does not display a company name, registered address, or accountable operator.
- No license authority or license number is presented in the visible site content.
- The domain registrar is OVH.
- The transport certificate is issued by YE1, uses domain validation (DV), and is valid until 2026-10-30.

What to Verify Next

Any prospective engagement should first establish the operator through an independently sourced business record and confirm that the intended account or gallery invitation was obtained through a trusted, offline or previously verified channel. Credentials should not be reused on this site, and any proposed payment, donation, or other sensitive transaction should remain suspended until the operator and purpose are independently confirmed.

EVIDENCE

- The captured page contains no external links or social-domain references that could independently corroborate the operator.
- No structured metadata, canonical reference, page title, or meta description was available beyond the visible gallery content.
- Two successful browser runs recorded no external XHR/fetch activity or external POST activity.

Summary Verdict

The overall posture is critical, with the site unsuitable for sensitive interaction and with operator identity not independently verified. The combination of confirmed external reputation contradictions and a context-poor authentication surface outweighs the site’s otherwise ordinary gallery presentation.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, which is a mitigating control for direct infrastructure exposure but is not evidence of legitimacy. Observed infrastructure consisted of edge addresses, with no origin candidate visible in the analysis.

EVIDENCE

- Served from AS16276, operated by OVH - OVH SAS, FR.
- Observed edge addresses were 145.239.37.162 and 2001:41d0:301::30.
- The infrastructure was resolved through two observed edge IPs, with 0 likely origin IPs identified.

Closing Assessment

The appropriate posture is read-only observation only; login, credential submission, financial activity, and other sensitive interactions should not proceed unless independent identity and purpose verification materially changes the assessment.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by page content, registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1hope.fr.

- The request stayed on 1hope.fr. It was not redirected to another domain. CLEAR
- Registration is published under OVH. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2027-01-26. NOTED
- The earliest public archive of this site is from 2017-03-16. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1hope.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
