Full analysis

Overview

1MusicMoz is a Portuguese-language music and media portal presenting artist pages, music uploads, downloads, trending content, playlists, news, social links, and an “1MZ For Artists” submission area; its apparent business model is audience-supported content distribution, advertising, and potentially paid artist promotion or distribution services.

Scam/Impersonation Risk

The site presents as a media portal rather than a financial or credential-phishing service, and page analysis found no explicit fraud indicators, brand impersonation, or phishing-style content. However, this benign presentation is materially contradicted by confirmed external blacklist detections, including multiple malicious classifications, making the domain unsuitable for sensitive interaction without independent resolution of those warnings. The standard login and newsletter forms, together with two observed password forms and substantial post-interaction DOM changes, increase the importance of treating credentials and account activity cautiously; these behaviors were not accompanied by external password submission, wallet activity, cloaking, or suspicious script activity. No conflicting legal-entity names were observed, so the concern is reputation-based rather than an identity contradiction. Evidence:

- The homepage presents music listings, artist content, downloads, charts, and social links, with no red-flag content identified.
- The site's external reputation assessment recorded 2 malicious and 2 suspicious detections, with a confirmed blacklist status.
- Browser testing recorded 2 successful runs, 2 password forms, 3,179 DOM mutations, and a maximum post-interaction DOM difference of 3,179; no external XHR or wallet activity was observed.
- The domain was registered on 2015-10-06 and is approximately 10.87 years old; its archive contains 86 snapshots spanning 2015-11-17 to 2026-05-18 across 12 tracked years.

Regulatory Verification Notes

The available pages expose contact, FAQ, artist-area, upload, and account functions, but the supplied content does not show a named legal entity, licensing claim, or registration number. For a media and distribution service, this is a disclosure gap requiring direct confirmation of the contracting entity, copyright-handling arrangements, payment terms, and applicable business registration before commercial engagement. A separate broker-oriented reputational dataset returned no match; that result is contextual only and does not establish regulatory status. The site's apparent identity is therefore plausible but not independently verified. Evidence:

- The navigation identifies "Contact Us," "FAQ – 1MZ For Artists," "Área do Artista," "Envio de conteúdo," and "Minha Conta," but the supplied page text contains no license number or regulatory disclosure.
- Domain registration is through TUCOWS.COM, CO., with an expiration date of 2026-10-06T10:30:04Z.
- The site is hosted on AS51167, CONTABO - Contabo GmbH, DE; the transport certificate is DV, issued by YR1, and valid to 2026-09-30T01:17:47+00:00.

What to Verify Next

Before any account, artist-submission, paid-promotion, or distribution arrangement, independently confirm the operating entity and its authority to accept and distribute submitted content. Confirm the official contact channels through an independent route, review the applicable rights, takedown, payment, and account-recovery terms, and determine whether any required business or copyright registrations apply in the relevant jurisdiction. Existing credentials should not be reused on this domain, and any payment request should be assessed through a payment method offering meaningful dispute protection. Evidence:

- The artist FAQ, artist area, upload instructions, contact page, and account functions are the site's relevant commercial and account-interaction surfaces.
- The homepage identifies the service as a music/content portal with artist submissions and distribution-related functionality.
- The site uses WordPress with Mailchimp for WP and includes login and newsletter forms.

Summary Verdict

The overall posture is **moderate trust with elevated sensitive-interaction risk**. The domain has a sustained operational history and coherent media-oriented content, but confirmed external reputation contradictions prevent a positive trust determination for account, credential, or commercial use. Apparent legitimacy should therefore not be treated as proof of operator identity or safety for sensitive actions.

Infrastructure Integrity

The site resolves directly to a single Contabo-hosted endpoint, with no CDN or WAF detected and one likely origin IP exposed; this provides no edge-layer mitigation, although the transport connection is protected by a

valid certificate. The infrastructure is technically identifiable but should be treated as a hosting arrangement, not as evidence of legitimacy.

Closing Assessment

Passive review may be reasonable, but sensitive interaction should remain suspended until the blacklist findings and the operator’s identity and commercial authority have been independently resolved.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
 - The structure of the page changed sharply while it was loading.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1musicmoz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
