

Is 1obmen.com a scam? TrustSniffer's high-risk assessment: 0/100

1obmen.com

Verdict

0

OUT OF 100

CRITICAL RISK

1obmen.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Expired-domain landing page indicating 1obmen.com registration has expired, offering renewal instructions and linking to Namecheap auctions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://1obmen.com/>

What 1obmen.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is an expired-domain landing page for 1obmen.com, presenting Namecheap renewal instructions and links to Namecheap's domain-auction listings rather than an active operating service. Its apparent purpose is domain recovery, redemption, and auction monetization.

Scam/Impersonation Risk

Confirmed external contradictions make sensitive interaction inappropriate. The domain is identified by external reputation systems as blacklisted, with four malicious detections and one additional suspicious detection. The hosting IP also carries 160 abuse reports with maximum confidence; those reports are attributed to shared WorldStream infrastructure rather than specifically to the domain, so they are contextual rather than conclusive evidence of conduct by this site. The page itself is a benign-looking expired-domain notice: it contains no active service, financial solicitation, login form, or sensitive form, and no brand impersonation or conflicting legal identities were identified. Nevertheless, the external detections materially outweigh the page's neutral presentation. Runtime observation also recorded extensive external activity, including 42 external XHR requests, 24 external POST requests, substantial DOM change after interaction, and 39 console errors, which is inconsistent with treating the page as a trusted basis for sensitive actions.

EVIDENCE

- The homepage states that 1obmen.com registration has expired and directs the domain holder to renew through a Namecheap account.
- External reputation evidence records 4 malicious detections, 1 suspicious detection, and a confirmed blacklist status.
- The hosting IP 2.59.170.20 has 160 abuse reports with a confidence score of 100; attribution is to shared WorldStream B.V. infrastructure.
- Domain registration telemetry records creation on 2023-07-09 and an age of 3.11 years; archival telemetry records 28 snapshots spanning 2009–2025, with 17 years tracked.

Regulatory Verification Notes

The observed page is a registrar parking page, not an operating financial, brokerage, or investment service. It identifies Namecheap and provides renewal, redemption-fee, and auction information, but it does not present an operating legal entity, regulatory authorization, or license disclosure for an active business. That omission is principally a content limitation because the page does not claim to provide a regulated service; it does not remove the separate security concern created by the confirmed external detections. The domain's independently verified operator identity remains unverified.

EVIDENCE

- The homepage uses a Namecheap landing template and directs visitors to domain renewal and auction functions.
- WHOIS telemetry identifies NAMECHEAP INC as registrar, with registration expiry on 2027-07-09.
- The site is served from AS49981 (WorldStream - WorldStream B.V., NL).
- The site's TLS certificate is issued by YE1 at DV validation level and is valid to 2026-11-15.

What to Verify Next

Before any interaction beyond passive viewing, the domain's status should be confirmed directly through the registrar's independently accessed official service rather than through links or prompts presented by the page. Any claimed ownership or renewal request should be validated through an established registrar account and an independently obtained support channel. No credentials, account authentication, payment details, or financial information should be submitted in connection with this domain.

EVIDENCE

- The homepage offers sign-in and renewal pathways for the expired domain.
- The homepage also advertises redemption fees and domain auctions.
- Runtime observation found no wallet connection, wallet-sensitive operation, or clipboard-hijacking activity in the tested sessions.
- The page presented no active sensitive form during direct content analysis.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site's apparent registrar parking function does not reconcile the confirmed external threat detections, and the real-world operator identity is not independently verified.

Infrastructure Integrity

The domain resolves directly to two likely origin addresses hosted by WorldStream - WorldStream B.V. in the Netherlands, with no CDN or edge-IP layer detected. Valid TLS provides transport encryption, but the certificate's DV validation establishes control of the domain connection rather than the legitimacy of the operator; the hosting arrangement therefore offers no sufficient basis to offset the external reputation risk.

Closing Assessment

The appropriate posture is passive observation only, with no login, credential submission, payment activity, or other sensitive transaction associated with the domain.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 160 reports on hosting IP 2.59.170.20 (WorldStream B.V., Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1obmen.com.

- The request stayed on 1obmen.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-09. NOTED
- The earliest public archive of this site is from 2009-10-06. CLEAR
- It is hosted on WorldStream, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1obmen.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
