Full analysis

Security Alert

Fortinet, Google, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as an online poker and gambling service branded “POKERHOKI88,” with a minimal landing page directing visitors toward login and registration for online wagering. Its apparent business model is to onboard users before they deposit funds for play, but the page provides little information about the operator, game mechanics, payment handling, or payouts.

Scam/Impersonation Risk

The site carries a **critical interaction risk** because independent reputation checks recorded a confirmed blacklist status and malicious detections, including a Safe Browsing match and multiple security-provider detections. These signals materially outweigh the ordinary presence of HTTPS and a functioning webpage. The homepage is also a high-risk gambling/login surface: it promotes account access and registration while providing no clear product detail, transparent value flow, payout explanation, or verifiable contact address. No conflicting legal-entity names or direct brand impersonation were observed, but the external threat detections are sufficient to treat login, credential submission, and financial interaction as unsafe.

EVIDENCE

- The homepage is labeled “POKERHOKI88” and “IDN POKER HOKI88 ONLINE,” with prominent “LOGIN” and “DAFTAR” prompts and an 18+ marker.
- The site’s single sensitive form was assessed as directing submissions to an untrusted destination.
- External reputation assessment recorded a confirmed blacklist hit and malicious detections from multiple independent sources.
- The domain was registered on 2023-10-02 and is recorded as 2.88 years old; archive coverage comprises 12 snapshots spanning 2023–2025, with 3 years tracked.

Regulatory Verification Notes

The available page content does not establish a legally identifiable gambling operator or demonstrate authorization to accept wagers. No license, licensing authority, registration number, payout terms, or substantive contact information is disclosed on the observed landing page; this is a material verification gap for a deposit-based gambling service, although the disclosure gap alone is not treated as proof of fraud. The real-world operator identity remains unverified, and ownership opacity limits attribution. The registrar is NAMECHEAP INC. Transport encryption is present, but the certificate is domain-validated rather than an identity-validated assurance and therefore does not authenticate the business behind the site. The absence of a broker-dataset match provides no positive regulatory conclusion.

EVIDENCE

- The homepage contains only approximately 156 characters of substantive text and no visible licensing, operator, address, payout, or transactional disclosure.
- The domain registrar is NAMECHEAP INC.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS is issued by WE1 at DV validation level and is valid to 2026-10-31.

What to Verify Next

Before any engagement, an independent check should identify the legal entity operating the service and confirm any claimed gambling authorization directly through the relevant regulator’s registry rather than through links or contact details supplied by the site. Payment, withdrawal, bonus, dispute, age-verification, and responsible-gambling terms should be obtained and reviewed independently. Any contact channel should be confirmed through an offline or independently sourced route, and no credentials or payment details should be entered while those checks remain unresolved.

EVIDENCE

- The homepage supplies registration and login controls without accompanying operator or licensing documentation.
- The observed page provides no clear explanation of deposits, withdrawals, payout calculation, or dispute handling.
- The site has no internal or external navigation links exposing additional legal, support, or compliance material.

Summary Verdict

The available evidence supports a critical trust posture with substantial risk attached to sensitive interaction. The website's apparent gambling function, minimal disclosure, unverified operator identity, and convergent external threat detections do not support treating it as a trustworthy service.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge infrastructure; no origin-server address was identified in the analysis. This reduces direct exposure of the underlying host but is only a mitigating infrastructure characteristic and does not establish legitimacy or offset the site's reputation risk.

Closing Assessment

The appropriate disposition is read-only observation only; login, credential submission, deposits, and other financial actions should not proceed unless independent operator, regulatory, and transaction protections are conclusively established.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, governance, page content, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED
- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1pokerhoki.online at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
