

Is 1stlearntodrive.com a scam? TrustSniffer's high-risk assessment: 0/100

1stlearntodrive.com

Verdict

0

OUT OF 100

CRITICAL RISK

1stlearntodrive.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Website for '1st Learn to Drive', an ODOT-approved driving school in Portland area offering teen and adult driving classes, schedules, locations, reviews, and contact information. Includes cookie/consent notice and standard site policies.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://1stlearntodrive.com/>

What 1stlearntodrive.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

1st Learn to Drive is a local driving-school website marketing paid instruction for teenage and adult learners, with class scheduling, locations, licensing-process information, and contact or booking pathways for prospective students.

Scam/Impersonation Risk

The visible site content is coherent with a driving-school business and the page-level review found no apparent phishing forms, brand-impersonation indicators, or other on-page fraud patterns. However, this benign presentation is outweighed by confirmed external threat detections: the domain is blacklisted by two external sources, and multiple evaluated detections classify it as malicious or suspicious. No identity contradiction, phishing finding, or explicit brand impersonation was established, but the confirmed blacklist status creates a material risk for sensitive interaction and is not explained by the site's otherwise ordinary service content. The domain's long registration history and sustained archive continuity provide provenance context, but they do not neutralize the current reputation finding.

EVIDENCE

- External reputation assessment recorded 4 malicious detections and 1 suspicious detection; a blacklist hit was confirmed by 2 external sources.
- Domain registration: 2013-07-03 (~13.13 years old).
- Web archive: 172 snapshots from 2013-08-30 through 2026-06-09, spanning 14 years tracked.

Regulatory Verification Notes

The site's legal and policy presentation includes privacy and cookie-consent material, while the homepage describes the business as an ODOT-approved driving school. The available evidence does not independently verify that approval or provide a confirmed license or registration number, so the regulatory status remains a verification gap rather than proof of misconduct. The real-world operator identity is also unverified. Transport security and conventional hosting are present, but those technical properties do not establish licensing or legal identity.

EVIDENCE

- Homepage content states that the school is ODOT-approved and provides teen and adult instructional services.
- Hosted on AS398101 (GoDaddy.com, LLC, US).
- TLS certificate issued by YR2, validation level DV, valid to 2026-11-13.
- The site includes privacy and cookie-consent notices in its policy presentation.

What to Verify Next

Before any booking or payment, the claimed ODOT approval should be confirmed directly with the relevant Oregon authority using an independently sourced registry or telephone contact. The legal business name, physical operating details, refund terms, and payment recipient should be matched against independent records and confirmed through a contact route obtained outside the website. Until the external detections are resolved and the operator is independently confirmed, activity should remain limited to non-sensitive informational browsing.

EVIDENCE

- Page analysis identified no login form, hidden form, or sensitive form.
- Browser testing recorded 2 successful runs with no wallet connection, wallet provider, or credential-capture behavior detected.
- The site provides class, location, review, FAQ, privacy, and cookie-related content for comparison during independent verification.

Summary Verdict

The overall posture is **critical trust risk**, driven by confirmed external threat contradictions despite coherent service content and established technical history. The website should not currently be treated as sufficiently trusted for credentials, payment information, or other sensitive interactions.

Infrastructure Integrity

The site resolves directly to a single hosting address without a detected CDN layer or WAF edge, so the infrastructure provides limited protective separation between the hosted service and its origin. This posture neither explains nor offsets the external reputation risk.

Closing Assessment

Prospective users should defer sensitive interaction until the operator, regulatory status, and payment arrangements have been independently validated; credentials and financial details should not be submitted in the interim.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1stlearntodrive.com.

- The request stayed on 1stlearntodrive.com. It was not redirected to another domain. CLEAR

- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-03. NOTED
- The earliest public archive of this site is from 2013-08-30. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1stlearntodrive.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
