What 1stofallconsulting.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

1st of All Consulting presents itself as a small-business consulting and creative agency offering value and sales education, creative consulting, idea and concept development, and event planning. Its homepage uses service descriptions, client testimonials, and contact/newsletter forms to generate prospective client engagements.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional consulting business and contains no apparent payment solicitation, investment offer, login form, or credential-harvesting mechanism. However, this benign presentation is materially outweighed by confirmed external threat detections and blacklist status, including detections from Kaspersky and Sophos. The available evidence does not establish an identity contradiction, brand impersonation, or phishing claim, but the external reputation evidence is sufficient to create a critical risk posture for sensitive interaction.

EVIDENCE

- The homepage identifies “1st of All Consulting LLC” and presents consulting, creative, sales-education, and event-planning services.
- External reputation checks recorded 16 malicious and 1 suspicious detections, with Kaspersky and Sophos among the flagged vendors.
- The domain was registered on 2020-05-05 and is approximately 6.29 years old.
- Four archive snapshots span 2021–2026, with six years tracked.

Regulatory Verification Notes

The homepage and footer present the business as “1st of All Consulting LLC,” but the available material does not independently verify the real-world operator. No regulated financial, investment, or payment activity is advertised, so the principal regulatory issue is identity and business-disclosure verification rather than a demonstrated licensing breach. The site’s transport security is technically valid, but domain validation does not authenticate the operating entity. The external broker-context check produced no matching result; that is limited reputational context and is not a licensing determination.

EVIDENCE

- The site’s homepage and footer describe a small-business consulting agency and display the 1st of All Consulting LLC name.
- The site’s hosting resolves to AS15169, Google LLC, US.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-11-09.
- The site does not present a license number or licensing authority in the supplied business-model evidence.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm that the named LLC exists and that the person or organization soliciting engagement is authorized to represent it. Any proposed paid engagement should be documented through independently verified business contact details, contractual terms, refund provisions, and payment protections. If a regulated service is later offered, its authorization should be confirmed directly with the relevant regulator rather than through site-provided claims.

EVIDENCE

- The site provides an About section, Services section, Contact route, and newsletter form that can be compared with independently obtained business records.
- The homepage presents client testimonials but does not provide independently verifiable client or registration details in the supplied content.
- The site contains one newsletter/contact form and no sensitive form was detected.

Summary Verdict

The overall posture is **critical trust risk**. Although the website’s content and apparent consulting model are internally coherent, the confirmed external threat detections and blacklist status dominate the assessment, while

the real-world operator remains unverified. The available evidence therefore does not support treating the domain as suitable for sensitive interaction.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed edge address was 35.212.37.50 on AS15169, Google LLC, US; no origin candidate was observed. This infrastructure provides a mitigating layer against direct exposure, but it does not offset the external reputation findings or establish legitimacy.

Closing Assessment

Prospective users should restrict activity to passive review until the operator, business relationship, and intended transaction are independently validated through trusted channels.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1stofallconsulting.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
