

Is 1xbet8887.cc a scam? TrustSniffer's high-risk assessment: 0/100

1xbet8887.cc

Verdict

0

OUT OF 100

CRITICAL RISK

1xbet8887.cc shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

WHAT THIS SITE APPEARS TO BE

A minimal 404 error page served by nginx containing short Chinese branding text; no interactive elements or monetization present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What 1xbet8887.cc served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at 1xbet8887.cc currently presents a minimal nginx 404 error page containing the Chinese branding text “凯发-感恩有你,一路同行.” It exposes no functioning service, product, transaction flow, or stated business purpose; its apparent role is therefore limited to a non-operational placeholder, although external security evidence materially elevates the risk associated with the domain.

Scam/Impersonation Risk

The domain is **blacklisted**, with corroborating malicious detections from multiple external security providers. This is the decisive risk signal and warrants a security-forward posture despite the absence of visible payment forms, login fields, or overt phishing content on the captured page. Browser observation also identified suspicious external network activity and non-whitelisted requests, while the site's minimal 404 presentation provides no reliable basis for establishing the operator's legitimacy. No separate identity contradiction or direct page-level brand impersonation was observed.

EVIDENCE

- External reputation telemetry recorded 18 malicious detections and 1 suspicious detection from 24 effective evaluations; an external blacklist hit was present and the protective kill switch was active.
- The homepage contained 32 characters of DOM text, including “404 Not Found” and “nginx,” with zero forms and no sensitive-data form.
- Browser testing recorded 2 external XHR requests, 2 external POST requests, 4 non-whitelisted external activities, and a maximum external-activity ratio of 60%.
- Web-archive telemetry recorded 1 snapshot spanning 2026–2026, with 1 year tracked.

Regulatory Verification Notes

The available site content does not present a legal entity, licensing authority, registration number, or regulatory status. That is a material verification gap for any service that might later become operational, but the current page makes no financial or regulated-service claim that can be independently assessed. The domain was registered through Gname.com Pte. Ltd.; this registrar fact does not establish the operator’s real-world identity. Transport security is present, but a domain-validated certificate confirms encrypted connectivity rather than corporate authorization.

EVIDENCE

- WHOIS telemetry records registration on 2026-07-07 and an age of approximately 0.11 years; registrar: Gname.com Pte. Ltd.
- Hosting telemetry records AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The TLS certificate was issued by WE1 at DV validation level and is valid to 2026-10-05T13:39:50+00:00.
- The captured homepage contains no license claim, licensing authority, or license number.

What to Verify Next

Before any sensitive interaction, an independent regulatory or corporate-registry check should confirm the operator, legal entity, and any authorization required for the intended activity. Any future login, payment, or account-registration request should remain suspended unless the operator’s identity and official contact channels are validated through an independently sourced route rather than through the site alone.

EVIDENCE

- The site content currently provides no legal-entity or licensing information against which an independent authorization match can be made.
- Identity verification remains unverified, so site-presented branding cannot be treated as proof of connection to a real-world operator.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not establish a trustworthy operating identity, and the external threat indicators outweigh the limited mitigating value of the site’s encrypted transport and delivery infrastructure.

Infrastructure Integrity

The website is served through Cloudflare’s CDN/WAF, with all observed addresses belonging to Cloudflare edge infrastructure and no origin candidate identified in the analysis. This reduces direct exposure of the hosting environment and may support traffic filtering, but it is only a protective infrastructure measure and does not validate the website or its operator.

Closing Assessment

Account login, credential submission, payment activity, and other financial interactions should not proceed unless independent identity, authorization, and channel-verification checks produce satisfactory results.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 1xbet8887.cc.

- The request stayed on 1xbet8887.cc. It was not redirected to another domain. CLEAR
- Registration is published under Gname.com Pte. Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-07. NOTED
- The earliest public archive of this site is from 2026-03-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 1xbet8887.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
