

Is 203krehab.com a scam? TrustSniffer's high-risk assessment: 0/100

203krehab.com

Verdict

0

OUT OF 100

CRITICAL RISK

203krehab.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A bare page containing only the name 'Tom Andros'. No links, forms, or metadata present; appears to be a minimal personal/placeholder page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 203krehab.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

203krehab.com presents a minimal personal or placeholder page displaying only the name "Tom Andros." It offers no visible service, product, transaction flow, or stated commercial purpose, so its apparent function is limited to identifying a person or placeholder rather than operating as an established business website.

Scam/Impersonation Risk

The site carries a clearly cautionary risk posture because external reputation checks recorded malicious detections and confirmed blacklist listings. The page itself does not show a brand impersonation, phishing form, or conflicting legal identity; however, its extremely limited content provides no meaningful basis for connecting the displayed name to a legitimate real-world operator. A separate abuse-report signal concerns a shared provider IP, so it does not by itself establish that the site caused those reports, but it remains an adverse external signal alongside the confirmed blacklist findings. The contact-channel integrity anomaly is the published address "info@example.come," whose malformed top-level domain could prevent delivery or represent a possible typosquat. Evidence:

- External checks recorded 3 malicious and 2 suspicious detections, with blacklist status reported by 2 external sources.

- The site's homepage contains only the displayed name “Tom Andros,” with no links, forms, metadata, or business explanation.
- Domain registration evidence records creation on 2008-08-01 and an age of 18.06 years.
- Web-archive records contain 39 snapshots spanning 2001–2026, covering 26 tracked years; the historical analysis found no suspicious repurposing or semantic drift.

Regulatory Verification Notes

The available page content does not establish a legal entity, regulated activity, or licensing position. The displayed personal name is not independently connected to an operator, company, or regulated institution, and the site's governance and ownership disclosures are therefore insufficient for institutional reliance. No broker match was identified in the available third-party context, but that is only a reputational observation and does not constitute licensing or regulatory confirmation. The valid transport certificate is a security control, not evidence of legal identity or authorization. Evidence:

- The homepage presents the name “Tom Andros” without an accompanying company name, legal notice, terms page, or regulatory disclosure.
- WHOIS records identify Dynadot Inc as registrar and show an expiration date of 2028-08-01.
- The site's TLS certificate is DV-validated, issued by YR1, and valid to 2026-09-18T05:46:43+00:00.
- The available broker-intelligence context reports no match.

What to Verify Next

Before any sensitive interaction, independently identify the operator through a reliable offline or previously trusted channel and confirm why this domain is associated with that person. If the site is intended to support a regulated, financial, property, or other professional service, confirm the relevant authorization directly with the applicable official registry rather than relying on the webpage. Any proposed account, payment, document-submission, or credential workflow should be validated only after those checks are complete. Evidence:

- The homepage has no login form, sensitive form, hidden form, or untrusted form destination.
- Observed browser runs recorded 0 wallet-connect executions, 0 wallet-sensitive actions, and 0 wallet-drainer actions.
- The page exposed no internal or external links through which an operator, service, or regulatory record could be followed.

Summary Verdict

The overall posture is **critical trust risk** and is unsuitable for sensitive interaction. The available evidence supports neither a verified operator identity nor a credible business purpose, while the adverse external reputation findings materially outweigh the benign presentation of the page.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, and the observed address is an edge server rather than an independently visible origin. This provides a meaningful layer of traffic and exposure mitigation, but protective hosting infrastructure cannot validate the operator or offset the site's external reputation risk.

Evidence:

- Served from AS16509 (AMAZON-02 - Amazon.com, Inc., US), observed edge IP 54.215.31.113.
- AWS CDN/WAF protection was detected; 1 edge IP was observed and 0 origin candidates were identified.

Closing Assessment

Sensitive actions should remain suspended unless independent operator, purpose, and authorization checks produce reliable corroboration; ordinary browsing of the static page does not resolve the underlying trust concerns.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 9 reports on hosting IP 54.215.31.113 (Amazon.com, Inc., Content Delivery Network), 16% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 203krehab.com.

- The request stayed on 203krehab.com. It was not redirected to another domain. CLEAR
- Registration is published under Dynadot Inc. CLEAR

- DNS for this domain is served by dyna-ns.net, across 2 name servers. NOTED
- The registration is paid up to 2028-08-01. CLEAR
- The earliest public archive of this site is from 2001-05-08. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 203krehab.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
