

Is 20763.cc a scam? TrustSniffer's high-risk assessment: 0/100

20763.cc

Verdict

0

OUT OF 100

CRITICAL RISK

20763.cc shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 59%.

What this site appears to be

The HTML contains only a container with a loading spinner element and no visible text, links, forms, or metadata. Unable to determine site purpose or trustworthiness from this content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	6 months old Most scam domains are under a year old	RISK

Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

<https://ylapp017.drtwlk.app/>

What 20763.cc served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at 20763.cc presents visitors with only a loading-spinner container and no visible text, links, forms, metadata, or identifiable commercial offering; its purpose and business model therefore cannot be determined from the captured homepage.

Scam/Impersonation Risk

No identity contradiction, brand impersonation, or phishing indicator was observed in the captured page content. However, the domain has a confirmed blacklist finding, with 14 malicious and one suspicious detections across evaluated security services; Fortinet and Sophos were among the flagged providers, and an additional external blacklist signal is present. This is a material security contradiction that outweighs the otherwise limited positive technical indicators. Browser testing also recorded substantial external network activity, including non-whitelisted requests, which increases concern about sensitive interaction even though no password form, wallet connection, or wallet-draining behavior was observed.

EVIDENCE

- Security reputation telemetry recorded 14 malicious detections and 1 suspicious detection; Fortinet and Sophos were identified among the flagging providers.
- The homepage's behavioral testing recorded 94 external XHR requests, of which 77 were non-whitelisted, and 6 external POST requests, of which 3 were non-whitelisted.
- The site's external blacklist status was recorded as true, while no brand impersonation was detected in the captured page analysis.

Regulatory Verification Notes

The available page does not identify an operating entity, provide legal terms, state a licensing authority, or publish a registration number. This leaves the operator identity unverified and creates a significant disclosure gap for any service whose purpose cannot even be established from the site. The absence of a matched broker record provides no positive regulatory assurance and should not be treated as a licensing determination.

EVIDENCE

- The homepage contains no visible operator name, legal disclosures, license claim, registration number, or business description.
- The domain was registered in 2026 and is approximately 0.28 years old; registrar: Dynadot Inc.
- Archive coverage contains 1 snapshot spanning 2026–2026, with 1 year tracked.
- Hosting was identified as AS4907, BGPNETPTLTD-AS-AP - BGPNET PTE. LTD., SG; the TLS certificate was issued by YR2 at DV validation level and is valid to 2026-10-04T08:53:19+00:00.

What to Verify Next

Before any sensitive interaction, an independent source should establish the legal operator, the service being offered, and any authorization required for that service. Any claimed license should be checked directly with the relevant regulator, and contact or support channels should be confirmed through an independently obtained route rather than relying solely on the website. Until the page presents a coherent and independently attributable service, credentials, account access, and financial activity should not be initiated.

EVIDENCE

- The captured homepage has no title, metadata, internal links, external links, or interactive forms.
- The page analysis recorded zero visible text characters and no sensitive form.
- Browser testing completed 2 successful runs but identified only a loading state and no interactive elements.

Summary Verdict

The overall posture is **critical risk**. The available evidence does not establish a legitimate operating identity or a credible purpose, while the confirmed security-reputation contradictions make sensitive interaction unsuitable.

Infrastructure Integrity

The site resolves directly to five likely origin IP addresses, with no detected CDN, WAF, or edge-IP layer. This offers no protective intermediary to mitigate exposure of the hosting environment; the infrastructure should therefore be treated only as a technical hosting arrangement, not as evidence of legitimacy.

EVIDENCE

- Infrastructure resolution identified 5 unique IP addresses, all classified as likely origin addresses.
- Detected edge IP count: 0; CDN present: false; trusted CDN: false.

Closing Assessment

Interaction should remain limited to non-sensitive observation until independent identity, authorization, and operational checks have been completed; credentials, account access, and financial transactions should not be attempted.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 20763.cc.

- The request for 20763.cc ended on ylapp017.drtwlk.app, a different domain. WATCH
- Registration is published under Dynadot Inc. CLEAR
- DNS for this domain is served by dyna-ns.net, across 2 name servers. NOTED
- The registration is paid up to 2027-05-05. NOTED
- The earliest public archive of this site is from 2026-02-26. CLEAR
- It is hosted on BGPNETPTELT-AS-AP, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 20763.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
