Full analysis

Overview

212Franchise Egypt is a corporate franchise and market-expansion website that presents opportunities across prefabricated steel structures, automation and robotics, floating houses and marine architecture, solar energy, smart-grid distribution, and smart-home devices, with an apparent business model of connecting manufacturers and product owners with distributors, developers, and investors across the Gulf and North Africa.

Scam/Impersonation Risk

The site's business presentation is coherent and the reviewed homepage shows no login form, credential-collection mechanism, payment flow, or explicit brand-impersonation indicators. However, the domain has been identified by external threat-intelligence checks as blacklisted, with multiple malicious and suspicious detections; this is a material contradiction that outweighs the otherwise professional presentation. Behavioral analysis also identified suspicious inline scripts, although no wallet-drainer, clipboard-hijacking, cloaking, or hidden-form behavior was observed. The available evidence therefore supports a clearly elevated risk for sensitive interaction, despite the absence of visible scam mechanics on the reviewed pages.

EVIDENCE

- External reputation checks recorded 2 malicious and 2 suspicious detections, with a confirmed blacklist hit.
- The homepage is classified as a corporate/franchise lead-generation page and contains no login form or sensitive form.
- The site's behavioral execution recorded 2 suspicious inline scripts and no wallet, credential, clipboard, or hidden-form activity.
- The domain was registered in 2019 and is 7.37 years old; archive records contain 7 snapshots spanning 2021–2025 across 5 tracked years.

Regulatory Verification Notes

The About Us and franchise-opportunity content describes a regional market-expansion and introduction service rather than a clearly regulated financial or investment product. No license, registration number, or licensing authority is claimed in the reviewed content, so the operator's legal capacity to provide franchise consultancy, placement, or introduction services remains a transparency point requiring independent confirmation. The site's apparent identity is plausible but not independently verified; its corporate language and social links should not be treated as proof of a legally established operating entity. A third-party broker-dataset search produced no match, which is contextual only and does not establish licensing or regulatory standing.

EVIDENCE

- The About Us content describes work with manufacturers, product owners, and innovators to develop brands and markets across the Gulf Region and North Africa.
- The reviewed franchise and contact content contains no displayed license number or licensing authority.
- The domain registrar is GoDaddy.com, LLC; registration dates are 2019-04-06T15:39:17Z to 2027-04-06T15:39:17Z.
- Hosting is on AS47583 (AS-HOSTINGER - Hostinger International Limited, CY); the TLS certificate is issued by YE1 at DV validation level and is valid to 2026-10-21T02:11:34+00:00.

What to Verify Next

Before any commercial engagement, an independent check should confirm the operating entity's registration, the authority of the named representatives, and any authorization required for franchise consultancy or intermediary services in the relevant jurisdictions. Proposed manufacturers, distributors, and investors should be validated through independently obtained corporate contact details and documented references rather than relying solely on site-provided introductions. Any contact route should also be confirmed through an independent offline or previously trusted channel.

EVIDENCE

- The homepage provides general corporate positioning but does not independently establish the legal identity of the operator.
- The business model is described as connecting international manufacturers with regional distributors, developers, and investors.
- The reviewed pages show informational and lead-generation content without visible transactional or credential-collection flows.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site appears professionally presented at the content layer, but the confirmed external reputation contradiction is decisive and prevents the available evidence from supporting normal reliance for consequential activity.

Infrastructure Integrity

The site resolves directly to a single hosting address on AS47583, operated by Hostinger International Limited, with infrastructure registered in Ukraine; no CDN edge layer was detected. This hosting arrangement is technically identifiable but provides no meaningful legitimacy assurance and should be treated only as infrastructure context, not as evidence of a trustworthy operator.

Closing Assessment

Prospective users should restrict activity to passive review until the operator, counterparties, and applicable commercial authorizations have been independently validated; credential submission, financial engagement, and other sensitive actions should not proceed on the basis of the website alone.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 212franchise.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
