

Is 227777.jp safe? TrustSniffer's low-trust assessment: 40/100

227777.jp

Verdict

40

OUT OF 100

LOW TRUST

227777.jp is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Small local electronics store in Miyazu, Kyoto offering sales and repair services, with contact phone, address, hours, and recent promotion notices. Identified as an authorized Sony repair intake location.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 227777.jp served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Japanese local electronics retailer and repair-service storefront for オーディオ南海宮津 in Miyazu, Kyoto. It presents appliance sales, repair intake, manufacturer promotion notices, opening hours, a physical address, and telephone-based customer support, with an apparent business model based on retail transactions, repair fees, and related in-person services.

Scam/Impersonation Risk

The site's visible content is consistent with a small local retail business and does not display a login form, payment form, wallet connection, or other obvious deceptive interaction. However, this benign page presentation is outweighed by confirmed external reputation contradictions: the domain is reported as blacklisted across external sources, with malicious and suspicious detections recorded. The result is a material risk that the domain, its content, or its infrastructure has been associated with harmful activity, even though the reviewed homepage itself contains no stated impersonation or phishing indicators.

EVIDENCE

- External reputation telemetry records 3 malicious detections and 1 suspicious detection for the evaluated domain; the domain is also marked as blacklisted.
- The domain was registered in 2008 and is approximately 18.44 years old.
- Web-archive records contain 91 snapshots spanning 2008–2026, covering 19 tracked years, with no confirmed suspicious repurposing identified in the historical analysis.
- The homepage contains no login form, hidden sensitive form, wallet-connection behavior, or detected brand-impersonation indicator.

Regulatory Verification Notes

The site presents an identifiable local-service proposition and publishes operational contact information, but the real-world operator is not independently verified by the available evidence. The site's legal and governance disclosures are unclear, and no license, registration number, or regulated-authority information is presented. Because the stated activity is retail and repair rather than an identified regulated financial service, the absence of a financial license is not itself evidence of fraud; it remains a transparency and identity-verification gap. The lack of a matching third-party broker record provides no affirmative regulatory validation.

EVIDENCE

- The homepage identifies the business as a local electronics and repair storefront and states that it is a Sony repair intake location.
- The homepage publishes a physical address, telephone number, opening hours, and service descriptions, but the reviewed material does not provide a legal-entity registration or license number.
- TLS is valid, uses DV validation, was issued by YR2, and is valid through 2026-10-20.
- The site's hosting resolves through AS7506, operated by GMO-I-R1 - GMO Internet, Inc., JP.

What to Verify Next

Before any payment, order, or exchange of personal information, an independent party should confirm that the published business address and telephone details correspond to the operating storefront, and should validate any Sony authorization or promotion directly through Sony's official customer-service or retailer channels. The legal operator should also be matched against an appropriate Japanese business registry, while payment should use a method offering dispute and chargeback protections. Official support and contact channels should be confirmed through an independent, offline route rather than relying solely on the website.

EVIDENCE

- The homepage supplies the address and telephone details needed for an independent storefront check.
- The homepage makes a manufacturer-authorization claim that can be validated through Sony's official channels.
- The site advertises manufacturer cashback and local-support promotions whose terms and beneficiary should be confirmed before payment.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. Although the website content appears coherent as a local retail operation and its technical service is stable, the confirmed external reputation contradictions and unresolved operator identity prevent the available evidence from supporting ordinary credential, payment, or other sensitive engagement.

Infrastructure Integrity

The site resolves directly to a single likely origin rather than a CDN edge, with no CDN detected. The origin is hosted by GMO-I-R1 - GMO Internet, Inc., JP, on AS7506 in Japan; this is a concrete hosting arrangement but not evidence of operator legitimacy, and the absence of a protective CDN/WAF layer provides limited infrastructure mitigation.

Closing Assessment

The appropriate posture is to restrict activity to non-sensitive inspection until the operator, manufacturer-related claims, and transaction protections have been independently confirmed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 227777.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
