

Is 22qq-client.com a scam? TrustSniffer's high-risk assessment: 5/100

22qq-client.com

Verdict

5

OUT OF 100

CRITICAL RISK

22qq-client.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page for 22QQ Client, a free Minecraft PvP mod compatible with Fabric 1.21.11. Describes module categories (Crystal, Combat, Render, Misc, Bypass), provides download and install instructions, and includes a short FAQ. No forms or financial interactions detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://22qq-client.com/

What 22qq-client.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as 22QQ Client, a free Minecraft PvP modification for Fabric 1.21.11, offering visitors a downloadable client, installation instructions, module information, and gameplay-oriented features intended to alter or extend in-game behavior.

Scam/Impersonation Risk

The site's content is distribution-focused and does not present login forms, payment functionality, or obvious financial solicitation. However, that benign page presentation is outweighed by confirmed external threat signals: the domain is blacklisted, and multiple security detections classify it as malicious or suspicious. The downloadable client includes functions such as Auto Hit Crystal, Trigger Bot, HitBox, Target ESP, Auto Totem, and bypass-related modules, creating a software-execution risk even though the page itself does not display conventional phishing mechanics. No distinct conflicting legal identities or explicit brand impersonation were identified in the supplied page evidence. Evidence:

- The homepage offers a downloadable Minecraft client and installation flow involving Fabric Loader, Fabric API, and placement of a client JAR in the local mods directory.
- The homepage describes automation and evasion-oriented functions, including Auto Hit Crystal, Trigger Bot, HitBox, Target ESP, and bypass modules.
- External reputation telemetry records 16 malicious detections and 2 suspicious detections, with a confirmed blacklist result from two external sources.
- Browser analysis found no login form, hidden form, external password submission, wallet connection, or clipboard-hijacking behavior on the homepage.

Regulatory Verification Notes

The website's apparent software-distribution purpose does not itself establish a regulated activity, and no financial service or regulated product is presented. Nevertheless, the reviewed content does not provide a clearly attributable legal operator, publisher identity, registration reference, or licensing information, leaving the real-world identity unverified. The domain is newly registered rather than long-established, which provides limited provenance support. A valid TLS certificate confirms encrypted transport but does not validate the publisher or the software. Evidence:

- The homepage identifies the product as "22QQ Client" but does not, in the reviewed content, identify a legal company or independently verifiable publisher.
- Domain registration telemetry records creation on 2026-03-14 and an age of 0.53 years, with Web Commerce Communications Limited dba WebNic.cc listed as registrar.
- The site is served through AS214351, associated with FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.
- TLS telemetry records a DV certificate issued by YR1, valid through 2026-12-20.

What to Verify Next

Before any download or execution, the purported publisher should be established through an independent channel and the client should be validated using a trusted malware-analysis process and cryptographic integrity information obtained from a separately verified source. The requested Minecraft and Fabric versions should also be confirmed against authoritative project documentation, and any support or update channel should be independently authenticated rather than trusted solely because it is linked from the site. Evidence:

- The homepage provides an executable client-download workflow but supplies no independently verified publisher identity.
- The homepage specifies Minecraft 1.21.11, Fabric Loader, Fabric API, and a client JAR installation process, creating a concrete software-supply-chain verification requirement.
- The reviewed page contains no external links or social-presence references that independently corroborate the publisher.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site may have a coherent software-download presentation, but the confirmed blacklist status and malicious detections create a materially adverse trust conclusion, while the operator identity remains unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a mitigating layer against direct exposure, but it does not establish legitimacy. The observed address was an edge address associated with AS214351, and the origin

was not observable in this analysis; consequently, infrastructure protection cannot offset the adverse external reputation evidence.

Closing Assessment

Interaction should be limited to passive review; downloading, executing, authenticating through, or providing sensitive information to the site should be withheld unless the publisher and software have been independently validated.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 22qq-client.com.

- The request stayed on 22qq-client.com. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications Limited dba WebNic.cc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-14. NOTED
- It is hosted on FEMOIT, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 22qq-client.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
