

Is 23paskal.id a scam? TrustSniffer's high-risk assessment: 1/100

23paskal.id

Verdict

1

OUT OF 100

CRITICAL RISK

23paskal.id shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 60%.

What this site appears to be

Simple corporate/venue page for '23 Paskal' listing promotions, facilities, contact and operational hours; managed by PT. Mitra Perdana Nuansa. Minimal content and no forms or obvious conversion flows in the captured HTML.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 23paskal.id served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

23 Paskal is a corporate venue and property-information website presenting promotions, facilities, contact information, operational hours, and management attribution for a physical complex; its apparent business model is venue leasing, facility management, and related promotions rather than online financial services.

Scam/Impersonation Risk

The site presents a low-complexity corporate homepage with no observed login, payment, credential-collection, wallet, or other sensitive interaction flow, and no page-level fraud indicators were identified. However, this benign presentation is materially outweighed by confirmed external blacklist status and multiple malicious detections associated with the domain. The contradiction is therefore reputational and security-relevant even though no distinct conflicting legal identities or direct brand-impersonation indicators were observed. The domain has meaningful historical continuity, but that positive provenance signal does not neutralize the current threat detections.

EVIDENCE

- External reputation checks recorded 3 malicious detections and 2 suspicious detections; the domain was also recorded as blacklisted.
- The homepage capture contained no forms, login mechanism, hidden sensitive fields, wallet activity, or suspicious inline scripts.
- Domain registration records show registration in 2016, with an age of 10.53 years, through PT Digital Registra Indonesia.
- Historical records contain 74 snapshots spanning 2017–2026, covering 10 tracked years.

Regulatory Verification Notes

The homepage provides an apparent venue-management attribution, but the available evidence does not independently verify the real-world operator or establish a regulated status. No license claim or license number is presented in the captured material; for a venue/property site this is a transparency point requiring contextual verification rather than, by itself, evidence of fraud. The limited page content and unclear governance disclosures leave the legal and commercial relationship insufficiently established for sensitive or financial engagement. A third-party broker dataset returned no match, which is only a neutral contextual signal and not a licensing determination.

EVIDENCE

- The homepage identifies the site as “23 Paskal” and displays a managed-by attribution, but the captured material does not independently substantiate the associated entity.
- The site's hosting infrastructure is served from AS47583 (AS-HOSTINGER - Hostinger International Limited, CY).
- The site uses a DV TLS certificate issued by YE2, valid to 2026-10-08T12:52:21+00:00.

What to Verify Next

Before any commercial commitment, an independent registry or official corporate source should be used to confirm the entity responsible for the venue and its authority to offer leasing or facility-management arrangements. Published contact channels should be validated through an independent route, and any proposed invoice, payment destination, contract, or request for credentials should be checked against the independently confirmed entity rather than relying solely on the website.

EVIDENCE

- The homepage supplies venue, facility, contact, and operational-hour categories but only limited substantive corporate information.
- The captured homepage contains no forms or obvious conversion flow through which a transaction or credential submission could be independently validated.

Summary Verdict

The overall posture is **critical trust concern** with a high likelihood that sensitive interaction would expose the organization or individual to avoidable security and reputational risk. The site's ordinary corporate presentation

and historical continuity are insufficient to offset the confirmed negative external reputation signals, while operator identity remains unverified.

Infrastructure Integrity

The available infrastructure record does not establish a CDN/WAF layer or an origin-masking arrangement. The identified endpoint is hosted within Hostinger infrastructure in Lithuania; the valid DV certificate supports encrypted transport but does not establish site legitimacy or operator identity.

Closing Assessment

Passive viewing of publicly presented venue information is the proportionate use case; login, credential submission, financial engagement, and other sensitive interaction should be withheld unless independent identity and transaction controls have been completed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 23paskal.id.

- The request stayed on 23paskal.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR

- DNS for this domain is served by 23paskal.id, across 2 name servers. NOTED
- The registration is paid up to 2027-02-10. NOTED
- The earliest public archive of this site is from 2017-02-24. CLEAR
- It is hosted on AS-HOSTINGER, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 23paskal.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
