What 247limocarservice.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a commercial local-service website for "24-7 Limo Car Service," presenting chauffeured limousine, luxury car, SUV, Sprinter, hourly, airport-transfer, and online reservation services across Los Angeles, Orange County, and surrounding areas.

Scam/Impersonation Risk

The website's visible content describes an ordinary transportation-booking business and the page analysis found no login form, credential-harvesting mechanism, hidden form, brand-impersonation indicator, or other obvious fraud feature. Those benign page-level characteristics are outweighed by a confirmed external blacklist condition: 14 malicious detections were recorded, including detections from Kaspersky and Sophos, and the site was also identified by an external blacklist. No conflicting legal identities were observed, but the threat detections create a material risk for sensitive interaction with the booking service. The domain's age and historical continuity provide background context but do not neutralize the current reputation signal.

EVIDENCE

- The homepage describes limousine, private car, SUV, Sprinter, hourly, airport, and online-reservation services for Los Angeles-area destinations.
- External reputation telemetry recorded 14 malicious detections, with Kaspersky and Sophos among the flagged vendors; an external blacklist condition was also present.
- Registration continuity shows the domain was created on 2014-03-22 and is approximately 12.41 years old.
- Archive records contain 40 snapshots spanning 2015–2026, with 12 years tracked.

Regulatory Verification Notes

The About Us, Contact, and reservation pathways present the service model and booking functions, but the available site content does not independently verify the real-world operator. No license, registration number, or regulatory authority is claimed in the analyzed business information, leaving a material disclosure gap for a service involving paid transportation. This is a verification issue rather than a standalone finding of fraud. A separate broker-reputation context check found no matching record, which neither confirms licensing nor offsets the external threat detections.

EVIDENCE

- The analyzed site links to About Us, Contact, Blog, and Online Reservations pages, but identity verification remains unverified.
- The site's business information does not state a license authority or license number.
- The site is served from AS22612, NAMECHEAP-NET — Namecheap, Inc., US.
- TLS uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2026-12-19.

What to Verify Next

Before any booking, payment, or submission of personal information, the operator should be independently matched to the relevant local transportation licensing or business registry, using details obtained through an offline or independently sourced channel rather than relying solely on the website. Contact details, vehicle and driver representations, cancellation terms, and payment-protection arrangements should be confirmed before a reservation is finalized. Any transaction should use a payment method offering meaningful dispute and chargeback protections.

EVIDENCE

- The site provides a reservation/contact form and an Instant Quote pathway, creating a direct customer-conversion surface.
- The page analysis found one form classified for reservation and contact purposes, with no sensitive form detected.
- The site's internal navigation includes separate About Us and Contact pages that can be checked against independently obtained operator information.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site's coherent commercial presentation does not overcome the confirmed external threat and blacklist indicators, while the real-world operator remains unverified.

Infrastructure Integrity

The site resolves through a direct hosting posture on Namecheap infrastructure, with no CDN or WAF layer detected and one likely origin address identified. Transport encryption is present, but a valid DV certificate and ordinary hosting infrastructure are limited technical protections and do not establish site legitimacy.

Closing Assessment

Pending independent confirmation of the operator and service credentials, activity should be limited to non-sensitive viewing; credentials, personal information, and payment details should not be submitted through the site.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 247limocarservice.com.

- The request stayed on 247limocarservice.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-22. NOTED
- The earliest public archive of this site is from 2015-05-23. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 247limocarservice.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
