What 24cleaning.by served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

24Cleaning.by is a Minsk-based local cleaning-service website presenting residential, office, post-construction, post-fire, pool, upholstery, maintenance-cleaning, and waste-removal services, with bookings handled through a published telephone number and a contact or quotation form.

Scam/Impersonation Risk

The website's service presentation is consistent with an ordinary local cleaning business: it has service descriptions, testimonials, FAQs, a telephone contact, and no login, password, wallet, or payment-credential form. However, this benign page-level presentation is materially outweighed by confirmed external reputation contradictions: the domain is blacklisted and multiple external detections classify it as malicious, with an additional suspicious result. The evidence does not establish a conflicting legal identity or direct brand impersonation, but the reputation findings create a security condition in which the site should not be treated as suitable for sensitive interaction.

EVIDENCE

- External reputation telemetry records 4 malicious detections, 1 suspicious detection, and a confirmed external blacklist for the domain.
- The homepage contains one contact/quote form, with no login form, hidden form, password submission, wallet connection, or external sensitive-form destination detected.
- The domain was registered in 2015 and is approximately 10.94 years old.
- Historical records contain 62 archive snapshots spanning 2016–2022, covering 7 years with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The visible content does not clearly identify a legal entity, registration number, licensing authority, or license number. That is a regulatory-transparency gap rather than independent proof of fraud, but it prevents the service claims from being tied conclusively to a verified operating organization. The registration record names Чубенко Елена Владимировна and lists Reliable Software, Ltd as registrar; this is an attribution signal, not independent confirmation of the business operator. Transport security is present, although domain-validated TLS and ordinary hosting infrastructure do not establish licensing or legitimacy.

EVIDENCE

- The homepage title is “24Cleaning.by — My WordPress Blog,” while the visible pages provide service and contact content without a clearly stated legal-entity disclosure.
- The domain registration record lists Reliable Software, Ltd as registrar and Чубенко Елена Владимировна as the organization.
- The site is served from AS6697, BELPAK-AS - Republican Unitary Telecommunication Enterprise Beltelecom, BY.
- The TLS certificate is issued by YR2, uses DV validation, and is valid to 2026-09-23.

What to Verify Next

Before any payment, appointment commitment, or disclosure of personal information, an independent registry check should confirm the operator’s legal status and authority to trade under the displayed business name. Published contact channels should be validated through an independent route, and any proposed payment arrangement should use a payment method with dispute and chargeback protections. External reputation warnings should also be reconciled with the alleged operator before sensitive interaction is considered.

EVIDENCE

- The site’s information and contact pages do not provide sufficient legal-entity or licensing particulars for independent regulatory confirmation.
- The booking process relies on the site’s published telephone and quotation route, making independent confirmation of those channels material before engagement.

Summary Verdict

The overall posture is **critical trust risk**. Although the site contains coherent local-service content and lacks obvious malicious interaction mechanics, confirmed external reputation contradictions prevent the domain from being treated as a trustworthy destination for sensitive activity. The apparent business identity remains only likely rather than independently verified.

Infrastructure Integrity

The site is resolved through direct hosting without a detected CDN or WAF layer; the observed address is 87.232.64.131, with no edge-IP layer identified. This provides limited infrastructure-based mitigation and does not offset the external reputation risk.

Closing Assessment

Sensitive actions—including login, credential submission, financial transactions, or disclosure of valuable personal information—should not proceed through this domain; any necessary review should remain read-only until independent operator and reputation validation is complete.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 24cleaning.by.

- The request stayed on 24cleaning.by. It was not redirected to another domain. CLEAR
- Registration is published under Reliable Software, Ltd. CLEAR
- DNS for this domain is served by hoster.by, across 2 name servers. NOTED

- The registration is paid up to 2026-09-11. NOTED
- The earliest public archive of this site is from 2016-02-01. CLEAR
- It is hosted on BELPAK-AS, from a server in BY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 24cleaning.by at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
