

Is 24hourit.ca safe? TrustSniffer's low-trust assessment: 25/100

24hourit.ca

Verdict

25

OUT OF 100

LOW TRUST

24hourit.ca is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 75%.

What this site appears to be

Single-line landing page for a 24-hour onsite IT and computer service in Edmonton claiming 20 years of experience. Minimal content and no interactive elements detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 24hourit.ca served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

24hourit.ca presents a minimal local-service landing page for “24 Hour IT,” offering 24-hour onsite computer and IT repair services in Edmonton and claiming 20 years of professional experience; its apparent business model is to charge local customers for service visits and repairs.

Scam/Impersonation Risk

The site’s stated business model appears ordinary and no brand impersonation, phishing form, or financial-service mechanism was observed on the landing page. However, this benign presentation is outweighed by confirmed external threat detections: four malicious and two suspicious determinations were recorded, alongside blacklist listings from two external sources. The combination of a very thin landing page and adverse external reputation creates a material risk that the page may not reliably represent a safe or verifiable service provider, even though no specific impersonated brand or identity conflict was established.

EVIDENCE

- The homepage contains approximately 73 characters of substantive text, limited to the “24 Hour IT” name, onsite computer service description, 20-year experience claim, and Edmonton location.
- External reputation assessment recorded 4 malicious and 2 suspicious detections, with a confirmed blacklist result from 2 sources.
- Domain registration records show registration on 2017-07-23 and an age of 9.08 years.
- Historical records contain 210 snapshots spanning 2021-11-23 through 2026-03-01, covering 6 tracked years.

Regulatory Verification Notes

The page does not provide a clear legal-entity identity, registration detail, or licensing information. For a local computer-repair service, the absence of a displayed license is not by itself evidence of misconduct, but it leaves the commercial identity and accountability of the operator unverified. The domain is nevertheless long-established and registered through Go Get Canada Domain Registrar Ltd.; those administrative indicators provide continuity but do not resolve the adverse external reputation or independently establish who operates the service.

EVIDENCE

- The homepage is a single-line service presentation with no visible legal, corporate, licensing, or registration disclosure.
- Registration records identify Go Get Canada Domain Registrar Ltd. as registrar, with creation date 2017-07-23 and expiry date 2028-07-23.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-10-09.

What to Verify Next

Before arranging an onsite visit, sharing device access, or making payment, independently confirm the operator's legal business name, Edmonton service address, telephone number, and service terms through an offline or independently sourced channel. Confirm any applicable local business-registration or consumer-protection requirements with the relevant authority, and obtain a written invoice, scope of work, data-access boundaries, and payment-protection terms before engagement. Official support and contact channels should also be confirmed independently rather than relying solely on the landing page.

EVIDENCE

- The homepage provides only a service name, location, experience claim, and service description, leaving key engagement details to be established independently.
- The observed page contained no interactive forms, login interface, or sensitive-data collection mechanism.
- Browser testing completed 2 successful runs and recorded 2 console errors; this supports technical availability but does not validate the operator's identity or reputation.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site has some indicators of technical continuity and a conventional local-service presentation, but those positives do not overcome the confirmed adverse reputation findings. The real-world operator remains unverified, so legitimacy cannot be treated as established.

Infrastructure Integrity

The site resolves directly to infrastructure associated with AS852, TELUS Communications Inc. in Canada, rather than a detected CDN or WAF edge. This provides a concrete hosting attribution but limited protective-layer evidence; infrastructure details should therefore be treated as contextual mitigation only, not as proof of legitimacy.

Closing Assessment

Use should remain limited to non-sensitive, read-only evaluation until the operator and engagement terms have been independently validated; credentials, device access, and payment details should not be provided on the basis of this site alone.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 24hourit.ca.

- The request stayed on 24hourit.ca. It was not redirected to another domain. CLEAR
- Registration is published under Go Get Canada Domain Registrar Ltd.. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2028-07-23. CLEAR
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on ASN852, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 24hourit.ca at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
