

Is 24securenow.com safe? TrustSniffer's low-trust assessment: 40/100

24securenow.com

Verdict

40

OUT OF 100

LOW TRUST

24securenow.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 75%.

What this site appears to be

Website for Twenty Four Secure Services Private Limited, an ISO-certified Indian security services company founded in 1999. Describes services, corporate profile, training, contact details and gallery. Appears to be an operational service provider site rather than a financial or high-risk offering.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

24 Secure Services presents itself as an Indian corporate security-services provider, offering manned guarding, event security, and security arrangements for retail, hotels, banks, hospitals, residential properties, and warehouses, together with training, consulting, careers, and corporate information. The site claims that Twenty Four Secure Services Private Limited has operated since 1999 and is ISO 9001:2015 certified.

Scam/Impersonation Risk

The website content is consistent with a conventional corporate security-services business: it contains substantial company, service, training, gallery, careers, and contact material, and no login form, credential-harvesting flow, wallet functionality, or other high-risk interaction pattern was identified. However, this benign presentation is outweighed by a confirmed blacklist hit and additional external threat detections, including one malicious and two suspicious classifications. The available evidence does not record a separate brand-impersonation finding or conflicting legal-entity names, but the operator's real-world identity remains unverified; therefore, the site's corporate presentation cannot be treated as proof of authenticity. The contact form is not itself a sensitive credential form, but it should not be used to disclose confidential information while the reputation contradiction remains unresolved.

EVIDENCE

- External reputation telemetry records `external\_blacklist: true`, with 1 malicious and 2 suspicious detections among the evaluated results.
- Domain registration evidence records creation on 2006-01-02 and an age of 20.64 years through the supplied observation period.
- Web-archive evidence records 206 snapshots from 2008-04-08 through 2026-05-12, spanning 19 tracked years, indicating substantial historical continuity without independently validating the current operator.
- The homepage contains 7,987 characters of rendered text and one contact/newsletter form; behavioral inspection recorded no login form, hidden sensitive form, wallet connection, or clipboard-hijacking activity.

Regulatory Verification Notes

The About and company-profile material identifies Twenty Four Secure Services Private Limited, describes a history beginning in 1999, and claims ISO certification and statutory compliance. Those are on-site representations rather than independently verified legal or regulatory evidence. No security-services licence number or licensing authority is presented in the supplied business-model evidence, creating a material verification gap for an organization offering guarding and related services. The available third-party broker dataset did not produce a match, but that result is contextual only and does not establish licensing or corporate legitimacy.

EVIDENCE

- The homepage and company-profile content state that Twenty Four Secure Services Private Limited is an ISO 9001:2015-certified security group and part of Twenty 4 Ventures Group Limited.
- Hosting resolves to AS398101, GoDaddy.com, LLC, US; domain registration lists GoDaddy.com, LLC as registrar.
- The site's TLS certificate is issued by YR2 at DV validation level and is valid to 2026-10-21.
- Page analysis identifies a corporate/service-provider site with services, certifications, awards, training, careers, contact content, and no recorded page-level red flags.

What to Verify Next

Before any contractual, employment, procurement, or sensitive information exchange, an independent party should confirm the named company and any claimed group affiliation through authoritative corporate records and confirm the applicable Indian security-services licensing or registration directly with the relevant authority. The ISO certification should be validated with the issuing or accrediting body, and contact channels should be confirmed through an independently sourced telephone number or offline business record rather than relying solely on the website. Any submitted form data should be limited to information appropriate for an initial business enquiry until those checks are complete.

EVIDENCE

- The About, certifications, company-profile, careers, and contact sections provide the specific claims and channels requiring independent confirmation.
- The supplied regulatory assessment records the on-page disclosure state as unclear and licensing as unverified.
- The site's contact/newsletter form was observed without a sensitive-field or untrusted-destination finding, but form safety does not validate the organization behind it.

Summary Verdict

The website has a credible-looking corporate presentation and substantial historical continuity, but its overall posture is low trust because external threat intelligence identifies a confirmed blacklist contradiction and the operator identity is not independently verified. Sensitive interaction risk is therefore elevated despite the absence of obvious phishing mechanics or high-risk functionality on the observed pages.

Infrastructure Integrity

The site is hosted directly through GoDaddy.com, LLC in the United States on AS398101, with one resolved address and no CDN or WAF edge detected. This provides identifiable hosting attribution but no specialized edge-layer mitigation; infrastructure characteristics do not offset the reputation concern.

Closing Assessment

The appropriate interim posture is passive review only, with login, credential submission, financial activity, and disclosure of sensitive business or personal information deferred until the independent identity, licensing, and contact checks are satisfactorily completed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 24securenow.com.

- The request stayed on 24securenow.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-02. NOTED
- The earliest public archive of this site is from 2008-04-08. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 24securenow.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
