The page as captured

https://24visionsspl.com/

What 24visionsspl.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

24-Vision Staffing Solutions Pvt. Ltd. presents itself as a Pune-based human-resources consultancy providing recruitment, staffing, HR services, training, and job listings for candidates and employers, with enquiry and resume-submission facilities.

Scam/Impersonation Risk

The site's stated business model and visible content are coherent with a conventional staffing consultancy, and the available page analysis identified no on-page credential-harvesting, login, wallet, or overt impersonation indicators. However, this benign presentation is materially outweighed by confirmed external threat detections: the domain is blacklisted, and multiple established security providers classify it as malicious or suspicious. The available evidence therefore supports a **high-risk posture for sensitive interaction**, despite the absence of a confirmed brand-impersonation or conflicting legal-identity finding. The domain's provenance is also inconsistent across technical sources: the registration record indicates a 2026 creation date, while archival records document

activity from 2016 onward; this discrepancy should not be treated as evidence of repurposing because the historical content analysis found no semantic drift or suspicious repurpose.

EVIDENCE

- External reputation assessment recorded 16 malicious and 1 suspicious detections, with Fortinet, Kaspersky, and Sophos among the flagged providers.
- The domain was confirmed on external blacklists; a separate major safe-browsing assessment did not mark it malicious.
- The registration record lists creation on 2026-05-30, corresponding to approximately 0.22 years, while archival intelligence records a domain age of 9.960301163586584 years.
- Archive records contain 19 snapshots from 2016-08-31 through 2023-05-30, spanning 8 tracked years.

Regulatory Verification Notes

The About and homepage content identifies “24 Vision Staffing Solutions Pvt. Ltd.” and describes operations in Pune, including recruitment across automotive, banking, BPO and ITES, engineering, hospitality, manufacturing, and logistics, alongside HR services and training. The site presents an address and telephone contacts and offers recruitment-related enquiry and resume-upload functions, but no license or registration number is claimed in the supplied evidence. That is a regulatory-transparency gap requiring independent validation, not by itself proof of fraud. Independent broker-reputation matching was not present, which provides no affirmative regulatory endorsement.

EVIDENCE

- The About page states that the consultancy was established in 2014, while the homepage also refers to establishment in 2016.
- The homepage identifies the business as “24-Vision - Staffing Solutions Pvt. Ltd.” and describes recruitment, HR allied solutions, training, and current openings.
- WHOIS records list Realtime Register B.V. as registrar and show expiration on 2027-05-30T08:10:24Z.
- The site's transport encryption uses a DV certificate issued by YE1, valid to 2026-10-29T12:39:07+00:00.

What to Verify Next

Before any sensitive engagement, an independent corporate or business registry should be used to confirm the legal entity, Pune address, and the claimed establishment history. Any recruitment or training fee arrangement should be validated through independently sourced contact channels, with written terms covering fees, refunds, employment representations, and data handling. The resume-upload workflow should be assessed for the minimum information requested, retention practices, and the actual destination of submitted documents. Given the external threat detections, the domain and any downloaded or submitted material should also be reviewed by the organization's security team before operational use.

EVIDENCE

- The homepage exposes two forms classified as contact and resume-upload forms.
- Browser testing completed two successful runs and found no hidden forms, password-external forms, wallet activity, clipboard-hijacking behavior, or cloaking.
- The site's contact and recruitment content supplies an address and telephone contact points that can be checked independently without relying solely on the website.

Summary Verdict

The website's corporate presentation is internally coherent, but the confirmed blacklist status and multiple malicious detections create a critical trust posture. Identity remains unverified, and the positive page-level appearance does not offset the external reputation evidence for sensitive interactions.

Infrastructure Integrity

The site resolves directly to likely origin infrastructure rather than a detected CDN edge, with four resolved IP addresses and no CDN identified. It is hosted on AS-HOSTINGER, operated by Hostinger International Limited, with the infrastructure geolocated in Ukraine; this hosting arrangement and valid TLS provide basic service integrity but do not establish legitimacy or mitigate the confirmed reputation risk.

EVIDENCE

- Served from AS47583, AS-HOSTINGER, Hostinger International Limited, CY; resolved infrastructure country: UA.
- Infrastructure data records 4 unique IPs, 0 edge IPs, and 4 likely origin IPs.
- TLS validation level: DV; issuer: YE1; valid to 2026-10-29T12:39:07+00:00.

Closing Assessment

Sensitive actions should be deferred unless the entity, contact channels, fee arrangements, and data-handling practices are independently validated and the domain is cleared through the organization's security controls.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 24visionsspl.com.

- The request stayed on 24visionsspl.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Realtime Register B.V.. [CLEAR](#)
- DNS for this domain is served by dns-parking.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-05-30. [NOTED](#)
- The earliest public archive of this site is from 2016-08-31. [CLEAR](#)
- It is hosted on AS-HOSTINGER, from a server in UA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 24visionsspl.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
